1. Introduction

Electrify America, LLC was created by the Volkswagen Group of America to invest \$2 billion in financially sustainable business opportunities that advance the use of Zero Emission Vehicle (ZEV) technology, \$800 million of which must be spent in California. From its inception early in 2017, Electrify America has moved rapidly to implement the \$2 billion ZEV Investment Commitment.

As detailed below, the third quarter of 2018 (Q3 2018 or Q3) was focused on securing real estate and preparing for construction of Electrify America's electric vehicle charging stations, including receiving the first permits issued for Electrify America sites in California. The marketing team deployed a brand-neutral education and awareness campaign, while the Green City Initiative launched its programs. Finally, Electrify America nearly concluded its National Outreach effort as part of its Cycle 2 planning process in preparation for the submission of the California Cycle 2 ZEV Investment Plan on October 3, 2018.

Electrify America publishes this quarterly report to share the progress and impact of its Cycle 1 investments in California.

2. A Network of Electric Vehicle Charging Stations

2.1 Introduction

As laid out in the Cycle 1 California ZEV Investment Plan, Electrify America intends to develop a network of electric vehicle charging stations along highly traveled highways and in six carefully selected metropolitan areas during Cycle 1 (see Figure 1). The planned network in California will consist of more than 600 DC fast charging dispensers at approximately 160 charging station sites. In addition, Electrify America will build approximately 1,500 charging stations at workplaces and multiunit dwellings in its six target markets. The network will deploy cutting-edge technology to deliver customercentric charging to consumers safely and conveniently, and it will connect California to the Electrify America national network in 40 other states.

To launch the network expeditiously, Electrify America initiated two distinct infrastructure strategies in California:

Metro area: public, workplace, and multiunit dwelling charging
Highway station

SunnyvaleSanta Clara

Los Angeles-Long
Beach-Anaheim

San DiegoCarlabad

Third Quarter 2018 Report to California Air Resources Board

First, the company utilized a robust procurement and real estate acquisition process to launch its statewide ultra-fast DC charging network.

Second, it hired highly qualified and experienced "turnkey" vendors to deploy and maintain charging stations at workplaces and multiunit dwellings.

These strategies allowed Electrify America to move forward quickly in partnership with existing industry leaders. Electrify America anticipates that 35% of its business-driven investments within California will be in disadvantaged or low-income communities.¹

2.2 Electrify America's DC Fast Charging Network

Electrify America's internal goal is to build or initiate construction of DC fast charging stations at about 160 distinct sites along high-traffic highways and in six targeted metro areas in California, based on the budgets established in the Cycle 1 California ZEV Investment Plan. This is an ambitious target, based on aggressive cost estimates, and it is subject to likely revisions as final station costs are realized. Target locations (known as "target zones") for each station were identified using Electrify America's proprietary station siting methodology, which projected locations where DC fast charging stations will be most needed by 2020.

2.2.1. Acquiring Station Sites in Station Target Zones

Before Electrify America can build a DC fast charging station in any of its carefully selected target zones, it must acquire access to a site to host the station. Therefore, real estate acquisition is a critical component of building a network of DC fast charging stations across California.

Using dedicated internal staff and external real estate experts, Electrify America took steps to secure licenses and leases from site hosts for the 10-year period of the ZEV Investment Commitment in each of its target zones during Q3 of 2018. In each target zone, Electrify America considers multiple real estate leads, based on their unique attributes, such as availability of three-phase power, site lighting, and access to customer amenities. To acquire high-quality sites, Electrify America has entered into master agreements with 25 large-scale real estate owners that provide access to sites nationwide,² as well as site host agreements with owners of desirable individual properties across California. (In 2017, Electrify America considered an average of seven real estate leads for each target zone.)

Within each target zone, specific sites are identified for further desktop analysis and then onsite assessments. Electrify America then validates the installation specifics with the local utility and property owner through a site walk and discussion. Throughout the site acquisition process, Electrify America

¹ Electrify America uses definitions for low-income and disadvantaged communities established by the State of California, which are published and mapped by CARB on its "Disadvantaged and Low-income Communities Investments" webpage: https://www.arb.ca.gov/cc/capandtrade/auctionproceeds/communityinvestments.htm

² Electrify America previously announced real estate partners including Simon Property Group, Walmart, Target Corporation, Brixmor Property Group, Kimco Realty Corporation, Sheetz, Inc., Casey's General Stores, Inc., DDR Corporation, and Global Partners LP's Alltown.

works closely with 14 electric utilities in California to determine efficient locations from a grid perspective with the lowest service connection costs for Electrify America.

The final step in the real estate process is to sign an individual lease with the property owner. Although many viable options may exist, ultimately, only one site will be leased or licensed within each target zone. In Q3 of 2018, leases or licenses were signed in 26 target zones, bringing the total number of target zones with signed leases to 97. Second quarter progress in real estate acquisition can be seen in Figure 2. Electrify America will continue to secure sites in the 4th quarter, and Electrify America currently projects that it will be able to secure leases or licenses for all stations planned during Cycle 1.

Electrify America strives to ensure that 35% of its business driven investments are in low-income or disadvantaged California communities. In keeping with these efforts, Electrify America strove to ensure that 35% of potential California sites in all stages of the site acquisition funnel – site identification, qualification, validation, and lease execution – were located in low-income or disadvantaged communities. In Q3 2018, Electrify America was able to exceed 35% among identified, qualified, validated, and lease executed DCFC station sites in California.

Figure 2 - California Site Acquisition

2.2.2 Constructing a Network of DC Fast Charging Stations

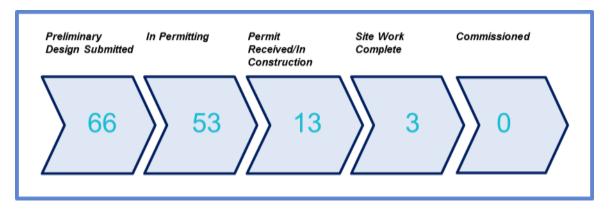

After an extremely thorough and competitive process, Electrify America awarded a contract to Black & Veatch for all DC fast charging station design and installation work in California. This engineering and construction firm, which maintains a regional office in California for all California sites and provides good paying jobs to thousands of California employees, contractors and subcontractors, has managed the installation of more DC fast chargers than any other engineering and construction company in the United States. In addition, the firm has an exemplary safety record and has an established track record of building complex projects on time and on budget. The selection of one of the most experienced and qualified construction firms in the United States ensures that the qualifications, training, or reliability of the construction workers who will be installing Electrify America charging stations in California are second to none.

In order to build Electrify America's stations, Black & Veatch is utilizing a deep and experienced pool of subcontractors throughout California. Furthermore, in order to expand the pool of subcontractors and

experienced workers, Electrify America has worked with Black & Veatch to invite new, qualified local companies to participate in project bids. For example, as a result of this outreach in Greater Los Angeles, new electrical contracting firms, including those who employ unionized electricians, have been subcontracted to help build a significant number of ultra-fast EV charging stations, thereby expanding the pool of local subcontractors qualified to gain future business. As station construction proceeds, Black & Veatch will monitor the quality and timeliness of the work by its subcontractors in order to ensure that all stations are built to Electrify America's extremely high standards. Electrify America anticipates that Black & Veatch will likely consider the performance of its subcontractors when awarding new subcontracts associated with additional Electrify America stations in the future.

In Q3 2018, Electrify America and Black & Veatch made progress designing DC fast charging stations in California and continued the permitting process (see Figure 3). Although Electrify America obtained its first 13 permits in California during Q3, the permitting process for EV charging stations in California took on average 56 business days, which is nearly twice the national average. Electrify America has obtained more than ten times as many permits outside of California as it has obtained within California, and Electrify America considers permitting delays and costly station changes resulting from permitting processes to be the largest threat to meeting the Cycle 1 California ZEV Investment Plan commitments on time and on budget.

Figure 3 - California Site Infrastructure Construction Tracker

To address this challenge, Electrify America reached out to California state agencies, including the Governor's Office of Business and Economic Development (GoBIZ) and the California Legislature, to communicate concern that some local jurisdictions are not complying with A.B. 1236's requirement that all jurisdictions establish a specific EV charging station permitting process that is "timely and cost-effective," and that permits can only be denied if a health or safety issue has been documented. Thanks to engagement from the Governor's office and Electrify America's direct engagement with local jurisdictions, improved EV station permitting processes were established in some jurisdictions, including Sacramento, Los Angeles County, and Rocklin.

Electrify America greatly appreciates the commitment to improved permitting demonstrated by the Brown Administration in Q3, and strongly supports and encourages continued State-level engagement

and oversight of A.B. 1236 compliance. Through guidance documents, staff level engagement with planning and permitting officials, state-level tracking of A.B. 1236 compliance, and legislative or other oversight hearings, the state government has the ability to spread best practices and clearly establish expeditious permitting of EV infrastructure as a statewide priority.

In Q3, Electrify America also dedicating substantial resources to this challenge. Electrify America relocated its National Construction Manager from Virginia to California, shifted project management personnel from other parts of the nation to California, opened a California office, and leveraging Government Affairs staff to meet with jurisdictions all over the state. Electrify America reached out to more than a dozen jurisdictions to discuss permitting challenges before permit applications have even been submitted, in order to discuss A.B. 1236 requirements and identify areas of local concern in the station design stage.

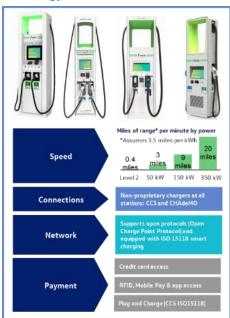

Despite these efforts, Electrify America had to cancel planned stations during Q3 in a few jurisdictions due to onerous requirements and lengthy permitting timelines that could not be met within Cycle 1 timeframes and budget requirements, reducing charging services in these communities.

2.2.3 Ultra-fast Electric Vehicle Charger Technology

Electrify America's customer-centric stations will use the most advanced technology ever deployed for convenient, fast charging (see Figure 4).

Highway stations will be equipped with chargers capable of delivering maximum power levels from 150 kW to 350 kW, which are capable of stepping down to lower power levels for vehicles equipped for lower powered DC fast charging. At maximum continuous power, 350 kW chargers will be able to deliver approximately 20 miles of range per minute to a vehicle, vastly improving the customer experience.³ To deliver this level of power safely and with customer convenience in mind, Electrify America stations will be equipped with state-of-the-art liquid-cooled cable technology.⁴

Figure 4 – Transformational fast charging technology

³ Idaho National Lab, DOE, and DOT refer to power levels of 350 kW because the limit of the standard is currently 350 amps multiplied by 1000 volts, or 350kW. Comments from OEMs and experts during the Outreach Plan process have led Electrify America to believe that the next generation of vehicles will be designed to go up to 920V. As such, the actual range delivered per minute will depend on the vehicle, as vehicles govern the power level accepted. This estimate assumes the vehicle being charged can travel approximately 3.5 miles per kWh.

⁴ Neither liquid-cooled cables nor 350 kW charging has ever been deployed commercially in the United States. As a result, Electrify America leased a small space for equipment quality control and validation in 2017.

Metro charging stations will feature configurations of either three or six chargers, reducing queuing times and providing redundancy in high-utilization urban areas. Consistent with Electrify America's commitment to deploying ultra-fast charging, Electrify America has chosen to upgrade up to 70% of planned 50kW Cycle 1 metro chargers to 150kW power. This power increase will offer consumers maximum charging speeds almost three times faster than initially planned.

Electrify America DC fast charging sites will support both the CCS Combo and CHAdeMO connectors. To maximize the ability of customers to use chargers regardless of which charging network they have joined, Electrify America plans to offer credit card and debit payment at all DC fast charging stations, creating an easy customer experience that is the primary goal of most interoperability efforts. Electrify America will equip all DC fast charging using the CCS standard with ISO 15118, which enables smart charging functionality in 2018 and beyond. Finally, all DC fast charging stations will be networked.

2.2.3.1 Chargers Ordered and Delivered

Following an RFP process, Electrify America selected four companies – ABB, BTC Power, Efacec, and Signet – as suppliers of its ultra-fast DC fast chargers during Cycle 1.⁵ Electrify America has ordered all of the more than 600 chargers needed in California for Cycle 1. These chargers are scheduled to be delivered to California station construction sites in 2018 and 2019, and the first nine DC fast chargers were delivered to California construction sites in Q3 2018.

2.3 Level 2 Workplace and Multiunit Dwelling Charging Stations

Electrify America targeted six metropolitan areas for community charging station investments in Cycle 1. In these six communities, Electrify America and its "turnkey" vendors (EV Connect, Greenlots, and SemaConnect) plan to install approximately 1,500 Level 2 (L2) chargers, with approximately 75% of the new L2 charging stations at workplaces and the remainder at multiunit dwellings (e.g., apartment buildings, condominiums and row houses).

2.3.1. Progress Deploying Workplace and Multiunit Dwelling Charging Stations

Electrify America oversees the process by which its three vendors secure station sites and deploy L2 charging stations within the boundaries of the targeted metro areas. Vendors use their own proprietary site leads analysis, supplemented by leads suggested by Electrify America, to identify and submit sites for preliminary review by Electrify America. Once sites have been reviewed and approved, vendors negotiate site host agreements with potential site hosts (e.g., property developers, office space facility managers, and other real estate site hosts). After acquiring a site, the vendor will pursue the necessary

⁵ Electrify America Press Release. "Designing and Deploying more than 2,000 Ultra-Fast Electric Vehicle Chargers across the U.S., Electrify America Selects ABB, BTC Power, Efacec and Signet as Charging Equipment Suppliers" April 17, 2018. https://www.electrifyamerica.com/downloads/get/744520

permits and install, operate, and maintain charging stations, providing a unique benefit to workplace and residential property owners.

At the end of Q3 2018, Electrify America's vendors had identified 1,235 leads in L2 target zones, and had qualified 776 leads as meeting key station site criteria. Vendors acquired 36 new sites in California in Q3, bringing the total to 64 acquired sites. The first three stations were operational in California in this quarter. Both the timeline to convert leads and the conversion rate did not meet projections during the quarter. In response, Electrify America continues to take mitigation actions to expedite the site acquisition process, and the three vendors leveraged extra sales resources, including new employees, to increase the pace. Electrify America is managing this program closely in an effort to get the program back on schedule. Chargers installed under this program will be networked and interoperable with the Electrify America charging network.

Each of the vendors is contractually obligated to install 35% of their overall station quota in low-income or disadvantaged community census tracts, and Electrify America must approve every station location to ensure this contractual term is being met. At the end of Q3 2018, more than 35% of qualified and acquired leads and two of three operational sites were in a low-income or disadvantaged communities.

2.3.2. Charger Technology

Electrify America-funded L2 charging stations will have a minimum power level of 6.6 kW (see Figure 5). The chargers will provide 20 to 25 miles of driving range per hour of charging using the non-proprietary SAE J1772 connector, which can be used with all electric vehicles in the United States.

Electrify America's L2 vendors own, operate, and maintain their own electronic data network in support of L2 chargers installed and operated on behalf of Electrify America, as well as those installed independently of the program's efforts. These vendors' networks will be able to connect and interoperate with Electrify America's network.

Figure 5 – Level 2 Charging Technology

Connector type	J1772
Maximum Power (kW)	6.6-9.6
Estimated charge rate	20-25 mi/hr.
Use case	Workplace/ MUD

3. Green City Initiative

3.1 Introduction

The goals of Electrify America's Green City Initiative are to increase ZEV awareness, provide ZEV access to underserved, low-income and disadvantaged communities, increase use of ZEV technology to maximize ZEV miles traveled while reducing greenhouse gas emissions, and test the economic viability of ZEV access initiatives (see Figure 6).

In Q3 2018, the Green City Initiative continued implementing programs in three investment areas: ZEV car share and ride-hail services; fleet services, including ZEV shuttle/bus; and charging infrastructure.

3.2 Car Sharing

In June 2018, Electrify America announced collaboration with two car share vendors: GIG Car Share, a wholly owned subsidiary of the American Automobile Association

Figure 6 – Green City Goals and Impacts

- Positively impact Zero-Emission Vehicle (ZEV) awareness and the community
- · Provide ZEV access to underserved communities
- · Increase use of ZEV technology
 - Initiatives will have high ZEV vehicle miles traveled (VMT) with substantial impact on greenhouse gas (GHG) emissions
- · Test economic viability of ZEV access initiatives
 - Spread economically proven programs to other metropolitan areas over time

(AAA), and Envoy Technology, Inc. GIG Car Share will provide a free-float car share service within the urban core of Sacramento. Complementing this investment, Envoy will provide a round trip car share model at multi-unit dwellings or community areas. Both car share providers will have a focus in low-income and disadvantaged communities. GIG Car Share will have an estimated 13 sq. mile "Home Zone" operations area, 70% of which is within low-income or disadvantaged communities. Envoy car share will have an estimated 75% of its properties located within low-income or disadvantaged communities.

With two unanimous votes in Q3, the Sacramento City Council set the stage for GIG to provide their free float car share model. In July 2018, the Council adopted permit fees for car share parking and EV charging spaces to provide cost certainty to this program. In August 2018, the Council set eligibility criteria and requirements for any car share operator seeking special parking privileges in the public right-of-way, as established in the City of Sacramento's Car Share Framework Terms and Conditions. Subsequent to the August approval, GIG ordered a fleet of 260 Chevy Bolts to begin operationalization of the car share program.

3.3 Infrastructure

Electrify America continued site acquisition efforts to purpose-place charging stations in Sacramento to support Green City programs, including car share. In Q3 2018, Electrify America secured twelve leases for station sites in the Sacramento region. Electrify America is focused on finalizing permitting, design, and initiating construction for the DCFC and L2 infrastructure.

In Q3, the Envoy service was busy identifying Sacramento properties and multi-unit dwellings to host the round trip car share service and L2 charging stations. The vendor signed 30 locations to Mobility Service Agreements and, alongside their L2 infrastructure contractor, conducted site walks and initiated design and permitting processes. The first dual port L2 unit was installed at Creekside Village located at 6465 Village Centre Drive.

3.4 Green City Marketing

In July 2018 Electrify America published a Request for Proposal for marketing services to support Green City mobility investments. After receiving multiple proposals and undertaking a competitive process, Electrify America selected 3Fold Communications, a local agency in Midtown Sacramento. 3Fold Communications has strong roots in many of the Sacramento's diverse communities, and the firm has demonstrated abilities to elevate awareness employing their unique and comprehensive perspective of California as a whole and the Sacramento region specifically. 3Fold Communications will create an awareness campaign for awareness for the Green City investment pillars reflecting the mission and goals of the program

4. Brand-Neutral Education and Awareness

4.1 Brand-Neutral ZEV Education and Awareness Media Campaign

In Q3, Electrify America launched the education and awareness campaign detailed in previous reports to educate consumers about the reasons to purchase a ZEV. The education and awareness effort included a brand-neutral TV (see Figure 7), radio, and paid search campaign in all California media markets and a landing page (www.plugintothreprsent.com) providing an overview on the benefits of ZEVs, with links to third-party websites containing robust content for users. Electrify America worked with its paid media agency to target media, including the Spanish-language radio spot, to specific zip codes containing low-income or disadvantaged communities.

Since the launch of the campaign, Electrify America has measured the success by the following metrics:

- The "Jetstones" commercial proved popular and was ranked the 5th most talked about TV ad on social media.⁶
- Awareness:
 - o 41% of all plugintothepresent.com sessions originated in California
 - 67% of website traffic accumulated from paid search, indicating targeting has been successful
- Engagement:
 - Online users spend on average 1 minute 27 seconds on the plugintothepresent.com website, with the incentive section being the most visited section of the website

In Q3, Electrify America made a commitment to match up to \$2 million for the nonprofit organization Veloz's "Electric for All" campaign in California. Furthermore, to amplify the "Electric for All" campaign, Electrify America added the campaign tagline to the end of its "Jetstones" commercial. To date, Electrify America has invested \$515,600 in Veloz. Thirty-five percent of the contribution to Veloz supports low-income and disadvantaged communities.

4.2 Partnerships

Electrify America has committed \$2-3 million to develop multiple collaborations with entities with particular access and credibility within California's disadvantaged and low-income communities.

This effort will raise awareness that ZEVs can affordably meet most consumers' needs today. Considerable evidence demonstrates that the gap between the perceived and actual affordability of

⁶ Desreumaux, Geoff, "This Week: The 10 Most Talked About TV Ads on Social," Wersm. August 19, 2018. Accessed October 8, 2018. https://wersm.com/this-week-the-10-most-talked-about-tv-ads-on-social-25/

ZEVs appears to be significant, and this gap presents a meaningful opportunity for an effective, targeted education effort.

More than 75 nonprofit, private, and public entities from across California were invited to submit proposals for this solicitation, including organizations suggested by CARB staff, and an explanatory webinar was conducted in June. In Q3, Electrify America conducted a competitive review of proposals, and awards to multiple entities are expected in Q4.

5. Outreach and Planning

5.1 National Outreach Effort

Consistent with Electrify America's commitment to engage in national outreach as part of its investment planning process, in Q3 2018, Electrify America continued its second call for comments, proposals, and recommendations to inform decisions regarding Cycle 2 investments in ZEV infrastructure, education and access programs. Electrify America intends to invest \$200 million in California, and \$500 million nationwide, in Cycle 2 – the 30-month period beginning in July 2019.

Over the past year, Electrify America has made a huge effort to engage with stakeholders throughout the ZEV adoption space to understand opportunities to increase ZEV adoption in California (Figure 8).

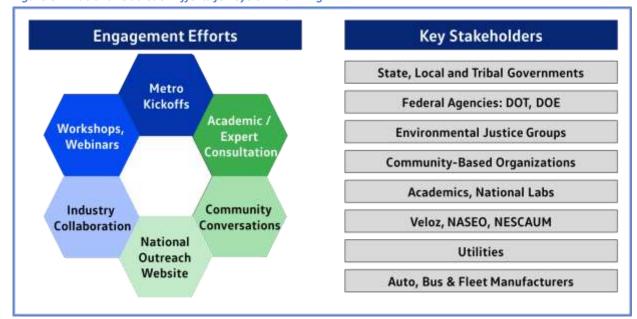

Figure 8 - National Outreach Efforts for Cycle 2 Planning

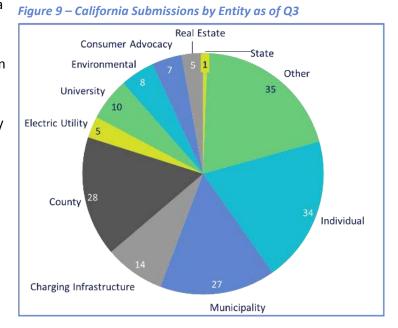

In January 2018, Electrify America opened a national outreach website to solicit specific information for Cycle 2 planning. The request for input provides an opportunity for governments, organizations, and

others to assist Electrify America as it updates its analytical models, evaluates new technology and public policy developments, tracks evolving consumer expectations, and explores the value of new allowable ZEV Investments. To assist in drafting the Cycle 2 ZEV Investment Plans, Electrify America specifically sought the following types of input:

- <u>Suggestions and Data Relevant to Cycle 2 Investments</u> Inputs from governments or
 organizations that are helpful to the decision-making process, including data for helping qualify
 appropriate new use cases or to place charging stations, ZEV infrastructure plans for individual
 communities, and information regarding state and local policies designed to increase ZEV
 adoption;
- <u>Education & Access Suggestions</u> Suggestions on Electrify America's approach to brand-neutral education and access or specific events it should consider for participation;
- Specific Site Locations Site locations nominated for consideration in Cycle 2 infrastructure investments;
- <u>Cycle 1 Comments and Feedback</u> Feedback on Cycle 1 National and California ZEV Investment Plans, including approaches to metro selection, highways included, evaluation of use cases, and integration of new technology; and
- Other All other comments or submissions that relate directly to Electrify America's ZEV Investment Commitment.

Electrify America advertised the submission period in California newspapers, reached out directly to hundreds of government staff and elected officials throughout California, and held multiple webinars to explain the process and answer questions from government stakeholders.

As a part of this process, Electrify America received over 700 submissions, including 174 from California, each of which has been carefully reviewed and considered in developing our Cycle 2 plan, with the largest number of submissions coming from governments (see Figure 9). Electrify America also received an additional eight charging station site suggestions in Q3, yielding a total 197 site suggestions, the vast majority of which were suggested in the six California metropolitan areas in which Electrify America is concentrating Cycle 1 community charging station investments (see Figure 10). Finally, considerable input was received on brand-neutral education and access programs.

Electrify America reviewed all new submissions closely in Q3 and reached out to submitters for clarification or to discuss collaboration where appropriate. All submissions received either a follow up phone call or an email response. In addition to reviewing the submissions, Electrify America continued active outreach to communitybased organizations, environmental justice organizations, local governments, and industry stakeholders in Q3 in order to solicit their suggestions and guidance regarding Cycle 2 investments. Input from these organizations, as well as from state agencies, municipal governments, federally recognized Indian tribes, and federal agencies, collected through this process will help Electrify America make informed, data-driven decisions about where to invest and what type of investments to make in Cycle 2.

5.2 Cycle 2 Planning

After considering all input received during the national outreach process, Electrify America completed its Cycle 2 California ZEV Investment Plan during Q3 and submitted it to CARB on October 3, 2018. The guiding principles Electrify America used when developing the plan were:

- 1. **Start from the basics**: Analyze both business fundamentals (e.g., highway and metro) and new business opportunities.
- 2. **Actively engage external stakeholders:** Collaborate with stakeholders throughout planning process to strengthen thinking.
- 3. **Emphasize real world inputs**: Leverage operational data, evidence, and customer-backed research to make data-driven decisions.

In September, dozens of California stakeholders received in-person or telephone briefings on the key components of the plan, to ensure the Electrify America was responsive to input.

The submission of our plan to CARB begins a public process to review whether the plan meets the terms and goals of the 2.0L Partial Consent Decree. We believe the Cycle 2 investments will meet and exceed these requirements, providing a technologically-advanced and customer-centric network of ultra-fast charging stations to the people of California and addressing a series of emerging needs.

6. Update on Cycle 1 Spending Forecasted to be Incurred During Cycle 2

Electrify America is making all possible efforts to fulfill its Appendix C commitment of spending \$200 million by the end of Cycle 1. However, as of the drafting of this document, Electrify America anticipates a ~\$10.5 million shortfall in Cycle 1 spending through June 2019 due to delays in bus procurement for the Green City Initiative. This cost includes ~\$9.6 million for twelve battery electric buses and ~\$0.9 million for post-production outfitting (e.g., fare readers, radios, bike racks). Electrify America is working with Sacramento Regional Transit and the bus supplier to finalize contracting, but long backlogs and manufacturing lead-times will force Electrify America to spend the money after June 30th, 2019 – likely in the second half of 2019. These investments will be funded with the Cycle 1 Green City Initiative budget as approved by CARB in the Cycle 1 California ZEV Investment Plan.

As a result of the eight month delay in investment at the beginning of Cycle 1, Electrify America substantially compressed its timelines for building DC fast charging stations in six California metro areas. Electrify America has rapidly accelerated the site acquisition and station design processes, and all stations are currently scheduled to be completed and commissioned by the end of Cycle 1. Electrify America is firmly committed to making every effort to meet these compressed timelines. However, the schedules do not include buffer periods to accommodate for unexpected delays. As a result, delays outside of Electrify America's control and not in Electrify America's schedule, such as permitting delays and extended utility interconnection processes, have the potential to push Cycle 1 metro DCFC station completion and commissioning into the second half of 2019. If work to complete these stations must extend into the second half of 2019, the stations will be funded with Cycle 1 budget as approved by CARB in the Cycle 1 California ZEV Investment Plan, and the investments are not expected to materially impact the Cycle 2 budget.

In the event that any investments planned in Cycle 1 cannot be fully funded through Cycle 1 budgets (e.g., if actual costs exceed forecasted costs), those investments will be completed using Cycle 2 funding.

Appendix 1: Investments in Low-Income and Disadvantaged Communities

Two of three L2 stations operational during Q3 2018 were located in disadvantaged or low-income communities.

Investment type	Location	Disadvantaged or Low- Income Census Tract
L2 Station (workplace)	Bigge Crane and Rigging Co. 10700 Bigge St. San Leandro, CA 94577	6001432400
L2 Station (workplace)	201 California 201 California St, San Francisco, CA 94111	6075011700
L2 station (Green City)	Creekside Village 6465 Village Center Dr. Sacramento, CA, 95823	6067004905

Electrify America also conducted targeted radio and television advertising in low-income and disadvantaged communities. Targeted census tracts are listed on the following pages.

Investment Type	Investment Zip Code	Location Name	LIC/DAC Tract
Targeted media buy	90001	Los Angeles	6037229420
Targeted media buy	90001	Los Angeles	6037239202
