Green Cities - Sacramento						11/19/2018	4	30	264	10.0	1.5	0.06	0.24%	0.37%	Nov-18	0.22%	Dec-18	0.12	No
Micro Sessions[1]						N/A	N/A	271	9	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

[1] Electrify America chargers begin transferring small amounts of power when a vehicle is connected and begins communicating with the charger. Micro sessions represent sessions where power is transferred but the session is not successfully initiated. Only sessions shorter than a minute and less than 0.5 kWh are categorized as micro sessions.

b. Workplace and MUD Charger Utilization (Charger Level)

c. Car-Sharing Utilization

Below are membership and utilization statistics for the Envoy Car-share Service, which launched at 12 locations in 2018. Certain properties – such as 1801 L Street, Terracina Gold, and Creekside Village – demonstrated growing interest. The other properties require additional marketing efforts to educate residents, register new members, and get tenants interested in the service. Envoy did not turn down any applicants for the service.

Utilization for November-December 2018

Property Name	Property Address	# of Users	# of Trips	Duration of Trips (mins)	Month Activated	Utilization
1801 L Street	1801 L Street, Sacramento, CA	4	12	1289	Nov	2.89%

Paid Media Performance Highlights

Awareness:

- Delivered a total of 17.4K impressions.
    - 55% against LIC/DAC zip codes in Sacramento
- Generated a total of 176 total clicks to sactozero.com
    - 55% coming from LIC zip codes

Consideration:

- Majority of time spent time on the on the Sac-to-Zero site was in the "Share-to-Zero" section, indicating that people are most interested in learning more about car-share options in Sacramento
    - 22% of engagements were in the "Charge to Zero" section of the site

Appendix 4: Progress Comparison

In 2018, Electrify America completed investments as laid out in the Cycle 1 California ZEV Investment Plan and Supplement. This Appendix provides a comparison between the milestones in the Plan, as supplemented, and the progress made in 2018.

a. ZEV Infrastructure

In Table 1 of the Cycle 1 California ZEV Investment Plan, Electrify America stated that it planned to have between 350 and 450 EV charging station sites under development or operational by the end of 2018. At the end of 2018, Electrify America had 255 station sites under contract and under development or operational, with 18 station sites operational.

The number of stations is currently below projections because (1) Electrify America was not able to begin site acquisition and station development until eight months into Cycle 1; (2) DCFC station permitting in California is requiring extensive station redesign and is taking almost 50 percent longer than the national average; (3) DCFC station construction costs in California are more than 30 percent above the national average due primarily to permitting requirements; and (4) as noted in the body of this report, workplace and MUD station site acquisition has required longer timelines than projected, but is on schedule to meet Cycle 1 commitments.

b. Education and Awareness

In Figure 35 of the Cycle 1 California ZEV Investment Plan, Electrify America provided a preliminary national and local media plan, in which Electrify America would launch two flights of brand-neutral media advertising – one in September 2017 and one in April 2018 – on both national television networks and through spot buys in California markets. Television was accompanied by two flights of radio and ongoing efforts in digital, social, and search channels. However, the Supplement to the Cycle 1 California ZEV Investment Plan noted that this schedule was no longer feasible, explaining that "all advertising buys and other education efforts have been cancelled. As Electrify America and CARB have discussed, Electrify America will have to restructure its investment schedules and milestones to accommodate this unexpected delay." The Supplement also committed $2-3 million in funding to investments in low-income and disadvantaged community brand-neutral education and awareness.

In 2018, Electrify America completed the brand-neutral education and awareness programs that had originally been scheduled for both 2017 and 2018. Electrify America completed two media flights, as committed in Figure 35. Flight 1 ran from August to October, and Flight 2 ran from November to December. The flights were multichannel, incorporating national TV, spot TV, radio, and streaming audio. And Electrify America also activated digital channels, including search and the www.PlugintothePresent.com website. Finally, Electrify America awarded $2.7 million in contracts to six community based organizations, consistent with the commitments made in the Supplement.

The Cycle 1 California ZEV Investment Plan also stated that "in months 13-22, we will explore various potential education partnerships," and it noted that additional media would be planned following the first two flights. Consistent with this schedule, Electrify America established a significant partnership with Veloz in 2018, and Electrify America scheduled a third flight of media for 2019.

c. Green City

In Figure 8 of the Supplement to the Cycle 1 California ZEV Investment Plan, Electrify America identified four milestones for the Green City Initiative by the end of 2018. As detailed below, the milestones were largely met or exceeded during 2018.

2018 Milestone Established in Figure 8 of the Supplement to the Cycle 1 California ZEV Investment Plan	End of 2018 Status of Milestone
Develop ZEV car-share service in coordination with vendor	Electrify America developed two car-share services in 2018 in coordination with vendors, and launched the Envoy service ahead of the Figure 8 schedule.
Complete construction of ZEV Charging Station Sites	One public DCFC station opened in 2018, and twelve stations were in the development or construction phase at year end. These stations are anticipated to complete construction in 2019.
Continue to Communicate Service to local citizens and stakeholders	In 2018, the SacToZero campaign launched, providing a large scale and comprehensive means for communicating about the Green City Initiative services to local citizens and stakeholders.
Explore other Green City Initiatives	Electrify America far exceeded this milestone, launching its shuttle and bus program as another Green City Initiative, and proceeding with two separate and innovative bus and shuttle programs.

Appendix 5: Education and Awareness Materials

a. Plug into the Present

Electrify America launched its brand-neutral "JetStones" Education and Awareness campaign in 2018. In California, Electrify America also supported the brand-neutral marketing efforts of Veloz, supported education and awareness programs led by community-based entities, and conducted 31 days of ride and drive events. Below are copies of advertisement materials and or other materials disseminated as a part of the activities.

"JetStones" Media Products

The JetStones campaign produced a TV spot, a bilingual radio spot, a bilingual website, and a stakeholder Toolkit. These products can be viewed or heard below or in the following locations:

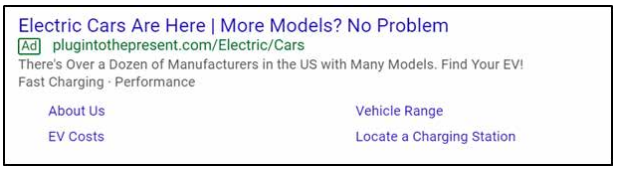
- **TV Spot**: A copy of the TV spot can be viewed here: https://plugintothepresent.com/#tv-spot

- **Radio Spot**: A copy of the radio spot, which was deployed on both traditional radio and digital streaming audio platforms like Spotify, can be heard here: https://plugintothepresent.com/#tv-spot. The Spanish language version can be heard here: https://plugintothepresent.com/es/#tv-spot.

- **Website (www.PlugintothePresent.com) Landing Page:** The brand-neutral campaign included the creation of English language and Spanish language website landing pages, which provide visitors with information about the campaign, the costs of ZEV vehicles, vehicle range, charging time, ZEV performance, EV charger locations, hydrogen fueling station locations, and EV and hydrogen fuel cell models. The English language page can be viewed here: https://plugintothepresent.com/#home. The Spanish language page can be viewed here: https://plugintothepresent.com/es/#home.

Figure 3-1: Smartphone Streaming Audio Advertisement

- **Digital Paid Search**: The campaign included paid search advertisements. Copies of these advertisements are:



- **Toolkit:** The brand-neutral campaign included the creation of a bilingual campaign toolkit, which was shared widely with stakeholders interested in building awareness and education of ZEV technology. The full toolkit is attached.

b. Collaboration with Veloz

Electrify America partnered with Veloz, a California-based non-profit organization, to match the contributions of other organizations to Veloz's California-centric brand-neutral "Electric for All" campaign. In 2018, the Electric for All campaign included the following components:

- **Website (www.ElectricforAll.org) Landing Page:** The brand-neutral campaign included the creation of English language and Spanish language website landing pages, which provide visitors with information about the campaign, why to drive electric, what it's like to go electric, which car is right for each consumer, EV charger locations, hydrogen fueling station locations, and EV and hydrogen fuel cell models. The English language page can be viewed here: https://www.electricforall.org/. The Spanish language page can be viewed here: https://www.electricforall.org/es.

- **Digital Videos**: The Electric for All Campaign developed and launched a series of digital videos featuring people of vastly different interests both benefiting from electric vehicles. The "Rabbi/Hipster" spot can be viewed here: https://vimeo.com/293191131. The "Punk Rocker / Symphony Goer" spot can be viewed here: https://vimeo.com/294469091.

- **Radio Spot**: A copy of the radio spot, which was deployed on both traditional radio and digital streaming audio platforms like Spotify, can be heard here: https://plugintothepresent.com/#tv-spot. The Spanish language version can be heard here: https://plugintothepresent.com/es/#tv-spot.

c. Discover and Drive Events

Electrify America partnered with Gail and Rice, and their subcontractor Forth, to provide 31 days of ride and drive events across California, which featured both battery electric and fuel cell vehicles. Information and advanced registration for the events was provided in Spanish and English at an event-specific page (https://electrifyamerica.rsvp360.co), and the events were promoted via Facebook and through co-hosts as well. Materials were provided in three languages. Copies of Spanish language and English language handouts "Electric Vehicles 101," "Vehículos de celdas de hidrógeno sin emisiones," and "¿Un Vehículo Electrico es Adecuado para Usted?" are provided.

d. Collaboration with Community-Based Organizations

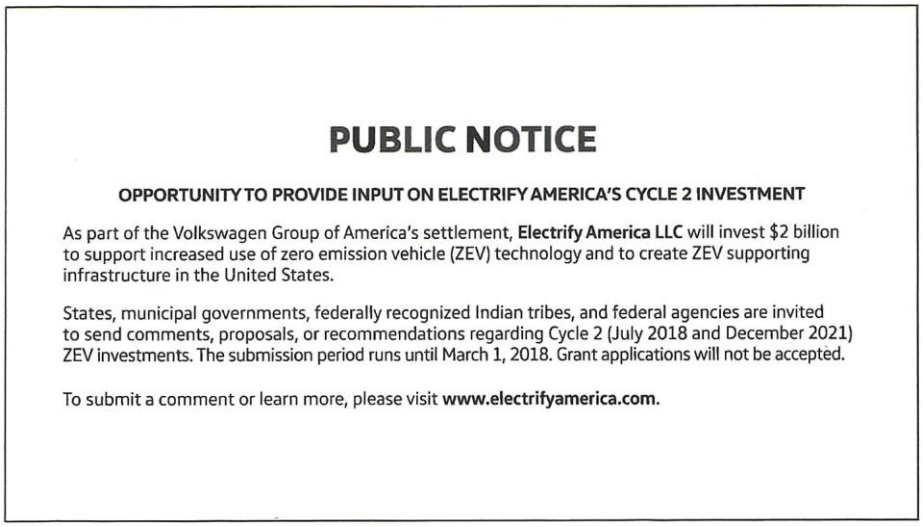
Electrify America partnered with six organizations in 2018 to build awareness of the economic opportunity of going electric in disadvantaged and low-income communities. These organizations began the process of building materials in appropriate languages in 2018. While not all materials were finalized and ready for publication by the end of 2018, some examples are attached at the end of the appendices.

One partner, Valley Clean Air Now, conducted a number of "Tune in and Tune Up" events in 2018 with Electrify America's support. Copies of advertisements for these events, in English, Spanish, and Hmong, may be viewed here: http://valleyair.org/drivecleaninthesanjoaquin/repair/.

e. Advertisement of National Outreach Process

In January 2018, Electrify America launched a second National Outreach Process to inform the development of the Cycle 2 National and California ZEV Investment Plans. Electrify America kept the website open for the entire year, and it received more than 800 submissions during that time. The outreach campaign was initiated through advertisements in major national and California publications. A copy of the advertisement is provided in Figure 5-1.

Figure 5-1 - National Outreach Plan Public Notice



PUBLIC NOTICE

OPPORTUNITY TO PROVIDE INPUT ON ELECTRIFY AMERICA'S CYCLE 2 INVESTMENT

As part of the Volkswagen Group of America's settlement, **Electrify America LLC** will invest $2 billion to support increased use of zero emission vehicle (ZEV) technology and to create ZEV supporting infrastructure in the United States.

States, municipal governments, federally recognized Indian tribes, and federal agencies are invited to send comments, proposals, or recommendations regarding Cycle 2 (July 2018 and December 2021) ZEV investments. The submission period runs until March 1, 2018. Grant applications will not be accepted.

To submit a comment or learn more, please visit **www.electrifyamerica.com.**

Brand-Neutral Marketing Toolkit

The era of the electric vehicle has arrived. It's time to:

PLUG INTO THE PRESENT

We're launching a national advertising campaign to raise awareness and increase adoption of Zero Emission Vehicles (ZEVs). We encourage you to join the movement and use our materials to help your audience learn the benefits of switching to a ZEV.

Our integrated campaign kicks off with a national TV and radio campaign — and launches a new educational website: www.plugintothepresent.com. Our goal is to broaden consumer awareness of the advantages and availability of electric vehicles and their supporting charging network.

ZEVs are not just a thing of the future — they're an exciting reality in today's auto industry. Our brand-neutral campaign features vehicles from six different car manufactures to showcase some of the major choices currently in the marketplace.

The campaign will run nationally starting August 13 and remain on air through June 2019. The website will be continuously updated and act as a source of information for consumers to learn more from additional sources.

We're happy to work with you to provide any available materials that will help educate your customers and prospects. And we've included potential social posts to make sharing easy. If you'd like to support our campaign, please share the commercial's YouTube link including the hashtag #electricforall — and drive your audience to www.plugintothepresent.com.

If you have any questions, please direct them to campaign@electrifyamerica.com.

ELECTRIC VEHICLES 101

WHAT IS AN ELECTRIC VEHICLE?

A battery electric vehicle (EV) is powered by an electric motor and fueled by a large rechargeable battery instead of a gas-burning engine. The latest electric vehicle models boast sporty acceleration, nimble handling, and more range than ever before. EV's eliminate the need to fill up at a gas station and produce zero tailpipe emissions. Other EVs are powered by fuel cells, which convert stored hydrogen fuel into electricity, instead of from a rechargeable battery.

HOW IS AN ELECTRIC VEHICLE DIFFERENT THAN A HYBRID?

Hybrids use both a battery and a gasoline engine to improve overall mileage. Other vehicles, are a cross between a hybrid and electric vehicle, and are called Plug-In Electric Vehicles (or PHEVs) can drive shorter all electric distances but when longer distance travel is needed, or when temperatures are extreme, they are designed to operate with both electric and gasoline power.

Benefits of Owning an Electric Vehicle

WAVE GOODBYE TO GAS STATIONS

Driving an electric vehicle means you will no longer need to stop at a gas station. Charging is simple: plug your vehicle in at home overnight, just like your phone. Or plug-in at work if your employer offers workplace charging. An increasing number of available DC fast charging stations allow many EV owners to top off between home or work for extended highway travel. There are apps like PlugShare that allow for easy view of available charging stations near you.

PERFORMANCE YOU CAN FEEL

With responsive torque from standstill, EVs accelerate quickly, and offer a quiet, comfortable ride. The acceleration and the quiet cabin are just a few reasons that make EVs fun to drive. Go see for yourself. Test-drive an EV at a dealer near you.

QUIET CABIN

There is virtually no motor noise in an electric vehicle making them nearly silent and vibration free. Research has shown that many EV drivers consider this "tranquil" cabin to be one of the strongest benefits of driving electric.

DRIVE ELECTRIC — CHECK OUT INCENTIVES

There are many incentives that can make purchasing an electric vehicle cost-efficient. Possible available incentives include, federal, state, and local tax incentives, HOV lane access, as well as insurance, parking, home charging station and utility incentives. These, combined with potential savings on fuel and maintenance are a few reasons that make EVs a financial no-brainer.

EV TECHNOLOGY

Most instrument panels on electric vehicles display the battery's range and current driving efficiency. And if you're using the navigation system functions, it may give you locations and routing to your preferred charging station. Many EV drivers love "one pedal driving" created when the braking energy (typically lost to heat and friction with typical braking) is being harnessed into added electricity for the battery.

FOR YOUR CONSIDERATION

EVs have zero tailpipe emissions. They can also be powered by renewable energy sources like solar panels, which can be installed in many homes, making EVs a very sustainable option.

ELECTRIC VEHICLES 101

Is an Electric Vehicle for You?

HOW LONG IS YOUR COMMUTE?

Even entry level EVs have a range of 80+ miles per charge, well within most of our daily commutes. And some of today's EVs have a driving range of 300+ miles per charge. With a variety of body styles to choose from, there should be an EV that is designed to go the distance that fits your lifestyle.

ARE THERE FAST CHARGERS IN YOUR COMMUNITY?

Even if you don't have access to a charger at your workplace, apartment building or condominium, you may be able to find a DC fast charger near you, which greatly reduces the time spent charging. Current 50 kilowatts (kW) DC fast chargers provide about 3 miles of range per minute of charge, and 150kW designs provide about 9 miles of range per minute of charge. As new electric vehicle battery technology improves, DC fast charging stations offer 350kW at an estimated 20 miles per minute, or estimated 200 miles of range can be added in 10 minutes. There are apps like PlugShare that allow for easy view of available charging stations near you.

ARE THERE CHARGERS WHERE YOU WORK?

If there are, you can instantly double your daily range. EV charging is becoming more and more common at the workplace.

DO YOU HAVE ACCESS TO CHARGING WHERE YOU LIVE?

If you have a power source where you park you are all set because you can plug right in to a regular 110V household outlet. If you desire faster charging or have a larger battery EV, you can install a home charger using the same 240V high-voltage outlet that powers your laundry washer, dryer or stove. This upgraded electrical support provides about 22 miles of range per hour of charge, versus about 5 miles of range per hour with a 110V household outlet.

NOCIONES BÁSICAS DE VEHÍCULOS ELÉCTRICOS

¿QUÉ ES UN VEHÍCULO ELÉCTRICO?

Un vehículo a batería eléctrica o VE, es un vehículo propulsado por una batería recargable de grandes dimensiones en vez de un motor de combustión de gasolina. Los vehículos eléctricos modernos ofrecen aceleración deportiva, un manejo fácil, y mayor alcance que nunca. Los vehículos eléctricos eliminan la necesidad de reabastecimiento en una estación de gasolina y no producen emisiones de carbono por la salida de escape. Otros VE obtienen la energía mediante celdas de hidrógeno, las cuales convierten el combustible de hidrógeno almacenado en electricidad, en vez de una batería recargable.

¿CÓMO SE DIFERENCIA UN VEHÍCULO ELÉCTRICO DE UNO HÍBRIDO?

Los vehículos híbridos utilizan a la vez una batería y un motor de gasolina para mejorar el kilometraje en general, pero aunque poco, siempre queman gasolina. Otros vehículos como el Chevy Volt, son un punto medio entre un vehículo híbrido y uno eléctrico, y son llamados vehículos eléctricos enchufables (PHEV, en inglés), pueden recorrer distancias cortas sólo con electricidad, pero cuando se necesita una distancia de viaje mayor o cuando las temperaturas son extremas, están diseñados para funcionar tanto con el suministro eléctrico o gasolina.

Beneficios de Poseer un Vehículo Eléctrico

NO MÁS ESTACIONES DE GASOLINA

Manejar un vehículo eléctrico significa que unca más necesitará detenerse por gasolina. Cargar es simple; cargue su vehículo en casa durante la noche, igual que su teléfono. O enchufe en el trabajo si su empleador ofrece un medio de recarga en su lugar de trabajo. Además, el incremento en la disponibilidad de estaciones de carga rápida de CC permite que muchos propietarios de VE puedan volver a cargar entre el trayecto de casa al trabajo o viceversa para aumentar el recorrido del viaje por carretera. Existen aplicaciones como PlugShare que le permiten ver estaciones de carga cercanas disponibles.

TECNOLOGÍA DE VANGUARDIA

El tablero de instrumentos de los vehículos eléctricos muestra el rango de alcance de la batería, la eficiencia de manejo actual. Y si se usan las funciones de navegación, provee ubicaciones y la ruta a su estación de carga predilecta. Muchos amantes de los EV adoran el “manejo con un pedal” creado cuando la energía de frenado (típicamente desperdiciada en calor y fricción en el frenado común) se aprovecha como electricidad añadida a la batería.

MANEJO SILENCIOSO

Prácticamente no existe ruido de motor en un vehículo eléctrico, lo que lo hace casi totalmente silencioso y libre de vibraciones. Las invertigaciones han demostrado que muchos conductores de vehículos eléctricos consideran esta “tranquila” cabina como uno de los más grandes benefcios de la conducción eléctrica.

BENEFICIOS MEDIOAMBIENTALES

La mayoría de los vehículos eléctricos están libres de aceite y producen menos emisiones de carbono por la salida de escape que los motores a gasolina. También pueden utilizar fuentes de energía renovable como la de los paneles solares, los cuales se puede instalar en muchos hogares, convirtiéndolos en una opción altamente ecológica.

RENDIMIENTO QUE PUEDE SENTIR

Gracias al torque que responde con una reacción inmediata, los EV aceleran rápidamente y ofrecen una experiencia de manejo silenciosa y cómoda. La aceleración y la cabina silenciosa son algunas de las razones que hacen que los EV sean divertidos de manejar. Compruébelo usted mismo y haga una prueba de manejo de un EV en un concesionario cercano.

EXPLORE LOS INCENTIVOS DE CONDUCIR UN EV

Hay muchos incentivos que hacen que comprar un vehículo eléctrico sea rentable. Algunos incentivos posiblemente disponibles incluyen incentivos federales, estatales e impositivos locales, acceso al carril HOV, además de incentivos de seguro, estacionamiento, estación de recarga en el hogar y de servicios públicos. Estos incentivos, combinados con los potenciales ahorros en gasolina y mantenimiento, son algunas de las razones que hacen de los vehículos eléctricos (VE) una decisión financiera obvia.

NOCIONES BÁSICAS DE VEHÍCULOS ELÉCTRICOS

¿Es un vehículo eléctrico adecuado para usted?

¿QUÉ TAN LARGO ES SU TRASLADO DIARIO?

Incluso los vehículos eléctricos de nivel básico tienen un rango de alcance de más de 80 millas (128 km) por carga, el cual sirve para la mayoría de nuestros traslados diarios. Y algunos de los EV modernos tienen un rango de alcance de hasta 250 millas por carga. Con una gran variedad de estilos de carrocería para elegir, debería haber un EV diseñado para su estilo de vida.

¿HAY CARGADORES RÁPIDOS EN SU COMUNIDAD?

Aún si no tiene acceso a un cargador en su lugar de trabajo, apartamento o condominio, podría encontrar un cargador rápido DC cercano, lo que reduce en gran medida el tiempo de carga. Los cargadores rápidos DC actuales de 50 kilovatios (kW) proveen unas 3 millas de rango por minuto de carga, mientras que los nuevos diseños de 150kW proveen unas 9 millas de rango por minuto de carga. Hay aplicaciones como PlugShare que le permiten ver fácilmente las estaciones de carga cercanas a usted.

¿HAY CARGADORES DISPONIBLES DONDE USTED TRABAJA?

Si los hay, instantáneamente usted puede duplicar su rango de conducción diario. La carga para los vehículos eléctricos se está volviendo mucho más común en los lugares de trabajo.

¿TIENE POSIBILIDAD DE REALIZAR LA CARGA EN SU HOGAR?

Si cuenta con una fuente de energía donde se estaciona, está listo ya que puede enchufar el vehículo de inmediato a una toma de corriente casera común de 110 V. Si desea una carga más rápida o tiene un vehículo eléctrico con batería más grande, puede instalar un cargador de casa utilizando la misma toma de corriente de alto voltaje de 240 V como la que utiliza su lavadora, secadora o estufa. Este suministro eléctrico mejorado proporciona un rango de alrededor de 22 millas (35 km) por hora de carga, contra aproximadamente un rango de 5 millas (8 km) por hora con una toma eléctrica de 110 V.

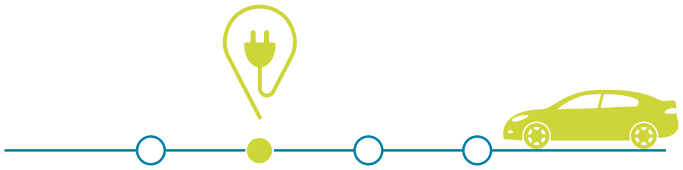
Discover and Drive Outreach Materials

¿UN VEHÍCULO ELÉCTRICO ES ADECUADO PARA USTED?

¿Sus traslados suman más de 80 millas al día?

No: ¡genial! La mayoría de los vehículos eléctricos pueden viajar 80 millas con una carga completa y muchos ofrecen más de 200 millas de rango.

Sí: considere los vehículos eléctricos híbridos enchufables, que brindan millas eléctricas y un motor a gasolina para extender el rango cuando sea necesario.



¿Tiene disponible una toma de corriente en su estacionamiento en casa?

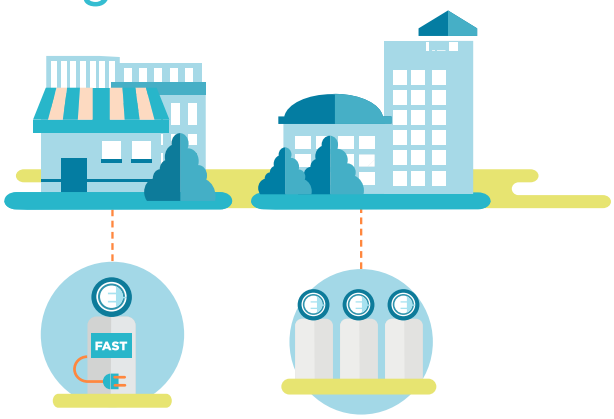
Sí: ya está listo. Lo único que necesita para cargar su VE durante la noche es una toma de corriente estándar de 120 V. También puede conseguir una toma de corriente común para secadora (240 V), la cual le brinda una carga mucho más rápida para las baterías más grandes de VE.

No: el costo requerido para instalar una toma de corriente de 120 o 240 V se recuperaría muy pronto en términos de ahorro de combustible y conveniencia.

¿Su comunidad cuenta con estaciones de carga?

Sí: ¡perfecto! Los cargadores rápidos disponibles en la actualidad le permiten recargar su vehículo a un ritmo de 3 millas de rango por minuto de carga, mientras que los nuevos diseños de 150 kW de Electrify America y otros proveedores le brindan 9 millas de rango por minuto de carga*.

No: ¿está seguro? En los Estados Unidos ya existen más de 50 000 estaciones de carga, y este número va en aumento. Además, muchas empresas están colocando cargadores rápidos en los estacionamientos para sus empleados.



* con base en un promedio de 3.5 millas de rango por kWh de carga

electrify america

CARGA DE SU VE: EN SU CASA, APARTAMENTO O CONDOMINIO

El 80%* de la carga del VE puede completarla en la comodidad de su hogar, lo que le brinda la posibilidad de tener una batería con carga completa cada mañana para sus actividades programadas diarias. Para mantener bajos los costos de sus facturas del suministro eléctrico, es posible configurar la mayoría de los cargadores para que completen la carga fuera de las horas pico, cuando el costo es menor.

Básico

Su toma de corriente casera típica brinda una carga de nivel 1 de 120 V (de 8 a 15 horas o más, dependiendo el tamaño de la batería de su vehículo).

Más rápido

Con la instalación de un cargador nivel 2 (240 V) en su garaje o cochera podrá reducir el tiempo de carga a entre 3 y 6 horas o más, dependiendo del tamaño de la batería.

* de acuerdo al Departamento de Energía

electrify america

BENEFICIOS DE ADQUIRIR UN VE USADO

- *Es silencioso y divertido de conducir: ¿escucha eso? Exacto. Ya no hay más ruido del motor, y la respuesta es inmediata al presionar el acelerador en un VE usado.*

- *Excelente precio: con los VE usados, por lo general es menos costoso comprar, mantener y operar que los vehículos semejantes que funcionan con gasolina. Por ejemplo:*

Vehículo eléctrico usado	Nissan Leaf S 2014
Precio de venta minorista sugerido por el fabricante para un vehículo nuevo original	$28,980
Precio promedio actual de un vehículo usado [1]	$9,389
Pago mensual promedio [2]	$182
Costos anuales de combustible (electricidad) [3]	$600
Ahorros estimados en costos de combustible durante 5 años [3]	$4,250

- *Cobertura de la garantía: las baterías de los VE y muchas de las partes relacionadas cuentan por lo general con una garantía de 8 a 10 años o 100 000 a 150 000 millas, lo que ofrece una mayor tranquilidad.*

- *Menores costos de mantenimiento: ya no necesita cambio de aceite, bujías ni mantenimiento del motor gracias al motor eléctrico. Al tener menos partes mecánicas significa que dedicará más tiempo a pasear y menos tiempo en el taller.*

electrify america

- *Traslados más cortos: los propietarios de VE usados pueden solicitar una autorización asequible para recibir una calcomanía que les permita el uso de los carriles menos congestionados HOV o para autos compartidos, disponibles en muchos estados, incluyendo California. Si adquiere un vehículo usado en California que ya cuente con la calcomanía, puede ponerla a su nombre.*

- *Ecológico: los VE son mucho más eficientes que los que utilizan gasolina, ya que convierten aproximadamente el 60 % de la energía eléctrica en potencia para las ruedas, en comparación con el 20 % de los motores a gasolina. Además, no emiten contaminantes por el escape, y pueden aumentar la independencia energética con el uso de fuentes de energía locales y renovables.*

- *Son numerosos en California: debido a que el Estado Dorado agrupa a casi el 50 % de todas las ventas de VE nuevos en los Estados Unidos, es común que cuente también con la selección más amplia de VE usados.*

1 Valor promedio de reventa por particulares, según Kelly Blue Book; vehículo en buenas condiciones con 36 000 millas y valorado con equipo estándar.

2 Pago mensual promedio con base en un Nissan Leaf S 2014 usado con un préstamo a 5 años; los pagos variarán según el modelo, equipo y condición del vehículo, la financiera, anticipo, ubicación y calificación crediticia del comprador.

3 Costos anuales estimados de combustible y ahorros en combustible según la Agencia de Protección Ambiental, comparados con los de un vehículo nuevo promedio

electrify america

Beneficios de poseer un vehículo eléctrico

La mayoría de las personas sabe que los VE son eficientes en el uso de combustible y mejores para el medio ambiente.

Pero, ¿sabía usted que...

nunca tendrá que volver a detenerse en la gasolinera?

es más divertido de conducir al llevar mayor energía directamente a las ruedas?

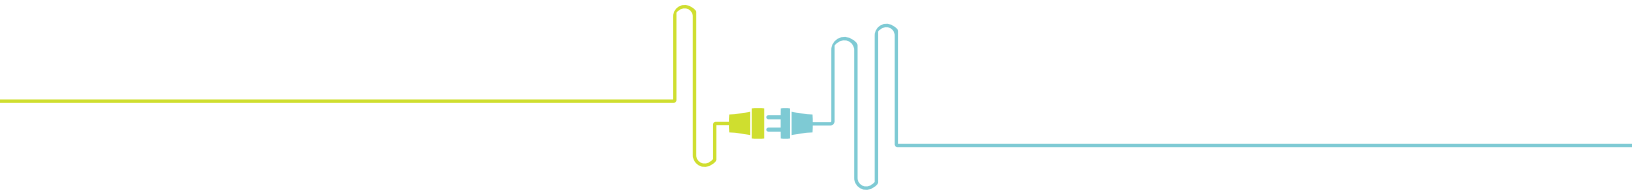
cambiar la batería de un VE es por lo regular mucho más barato que gastar combustible?

es posible obtener la energía para los VE a partir de fuentes renovables, como la energía solar?

los VE requieren de mantenimiento mínimo y nunca necesitan cambio de aceite?

los VE ofrecen la experiencia de manejo más silenciosa?

puede recargar las celdas de hidrógeno en las estaciones ubicadas a lo largo y ancho de California?



Promover el futuro de los vehículos eléctricos
Lo que debe saber

¿Qué es Electrify America?

Electrify America es una nueva compañía creada en 2017 como parte del Grupo de compañías de Volkswagen. Se trata de una organización dedicada a invertir en la infraestructura de los vehículos cero emisiones (ZEV, en inglés) y en la creación de conciencia para impulsar el uso de los vehículos eléctricos. Electrify America está ubicada en Reston, Virginia.

¿Electrify America creará estaciones de carga para los lugares de trabajo y propiedades multifamiliares?

Sí. Una de las metas de Electrify America es incrementar la infraestructura de carga en el lugar de trabajo, pues este es probablemente el segundo lugar donde el vehículo pasa más tiempo estacionado, superado solo por el hogar. Electrify America instalará además estaciones de carga en edificios de apartamentos, condominios y otras propiedades multifamiliares.

¿Electrify America atiende a las comunidades de bajos ingresos y en desventaja (calidad del aire)?

Sí. Mediante el proceso de selección, Electrify America se esfuerza por garantizar que el 35 por ciento de sus estaciones de carga se encuentren en áreas desatendidas para todas las cargas comunitarias. En cuanto a las autopistas, Electrify America tiene como objetivo acercar el 50% de sus instalaciones a comunidades de bajos ingresos o en desventaja.

¿Qué es la iniciativa de Ciudad Verde de Electrify America?

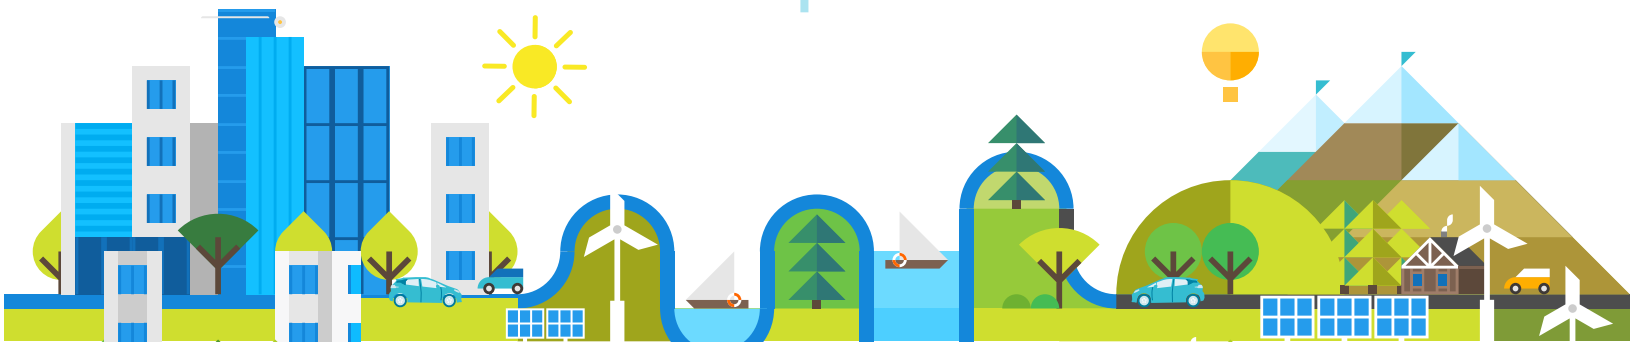
La iniciativa de Ciudad Verde acercará la infraestructura de los vehículos cero emisiones y los programas de acceso a las nuevas generaciones a Sacramento, nuestra primera Ciudad Verde en California. Nuestro presupuesto de$44 millones ayudará a financiar la instalación de muchas estaciones de carga en todo Sacramento para respaldar los programas de autos compartidos con base en VE, transportes y otras opciones de movilidad nuevas.

¿Quién forma parte de Electrify America?

Electrify America es una organización diversa, y el personal suma la experiencia de distintas industrias y disciplinas, incluyendo la automotriz, carga de vehículos, tecnología y gobierno. El número actual de empleados es de más de 60, la mayoría de los cuales están enfocados en la planificación de la infraestructura, asociaciones y operaciones. Un equipo adicional se encarga de la mercadotecnia, la educación y la iniciativa de Ciudad Verde de California.

¿Cómo logrará esto Electrify America?

Al desarrollar la conciencia pública mediante eventos educativos y vivenciales, incluyendo Electric Vehicle Ride & Drives, y al crear una red de cargadores a nivel nacional que sea accesible, cuente con la tecnología avanzada y centrada en los clientes, en los lugares de trabajo y unidades multifamiliares, tiendas, restaurantes y centros comerciales, así como en muchas de las autopistas de los Estados Unidos.



Vehículos de celdas de hidrógeno sin emisiones

- *El hidrógeno es el elemento más abundante en el planeta*
- *Es posible utilizar las celdas de hidrógeno para alimentar diferentes objetos, entre ellos los vehículos sin emisiones*
- *Las celdas de hidrógeno son una forma más silenciosa y limpia de generar energía para los vehículos, ya que lo único que se genera a través del escape es agua*
- *¿Le preocupa el rango de conducción? Tranquilo: las celdas de com bustible de los vehículos ofrecen normalmente más de 300 millas de rango.*
- *En California existen más de 30 estaciones de recarga de hidrógeno, y algunos fabricantes ofrecen el servicio sin costo (hasta cierto límite), o con un subsidio.*

electrify america

¿Qué es un vehículo eléctrico (VE)?

Un VE es un vehículo que:

- Utiliza una batería recargable o celdas de hidrógeno, en lugar de un motor a gasolina
- Ofrece una aceleración sorprendentemente rápida
- Opera de manera suave y silenciosa
- No produce emisiones de escape

Advancing the Future of Electric Vehicles
What You Should Know

What is Electrify America?

Electrify America is an all new company formed in 2017 underneath the Volkswagen Group of companies; they are an organization dedicated to investing in Zero Emission Vehicle (ZEV) infrastructure and awareness to help drive adoption of electric powered vehicles. Electrify America is headquartered in Virginia.

How Will Electrify America Accomplish This?

By increasing public awareness through educational and experiential events including Electric Vehicle Ride & Drives; and by creating a nationwide network of chargers that is accessible, technically advanced and customer-centric in workplaces, multi-unit dwellings, retail establishments, restaurants, and along major highway corridors.

Will Electrify America Create Charging Stations for Workplaces and Multi-Family Properties?

Yes. One of the goals of Electrify America is to increase charging infrastructure at the workplace, the second most likely place a vehicle spends time parked trailing only the home. Electrify America will also be installing charging stations at apartment buildings, condominiums and other multi-family properties. These units are currently underserved in terms of available charging compared to most single-family homes where charging is easier to install.

Is Electrify America Serving the disadvantaged (air quality) and Low Income Communities?

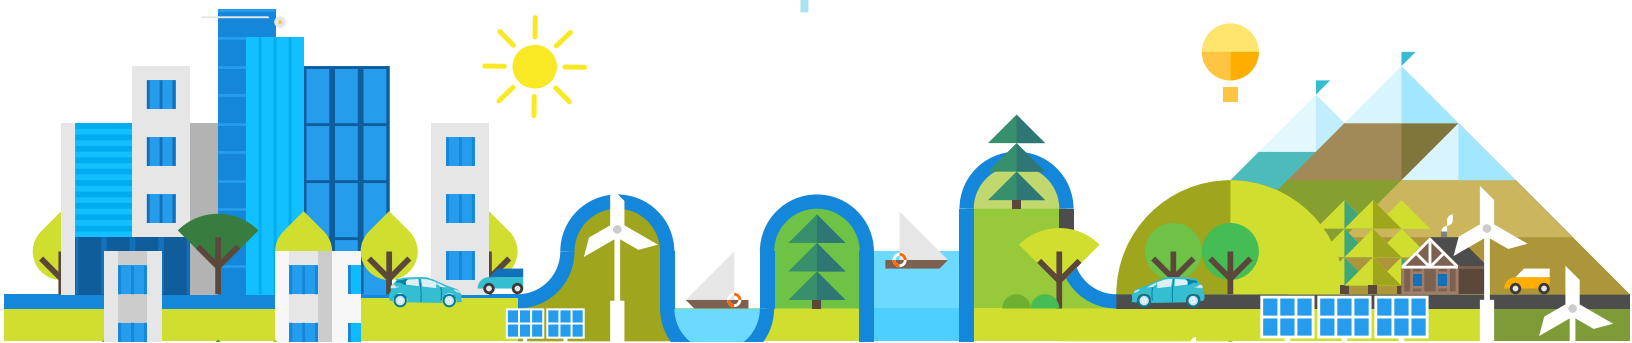
Yes. Through the site selection process, Electrify America strives to ensure that 35 percent of its Cycle 1 charging station investments are located in disadvantaged or low income communities.

What is Electrify America's Green City Initiative?

The Green City initiative will bring Zero Emission Vehicle infrastructure and new generation access programs to Sacramento, our designated California Green City. Our $44 million budget will help fund the deployment of many charging stations throughout Sacramento as well as to support the setup and running of EV-based car share programs, ride hailing and other new mobility options.

Who Makes up Electrify America?

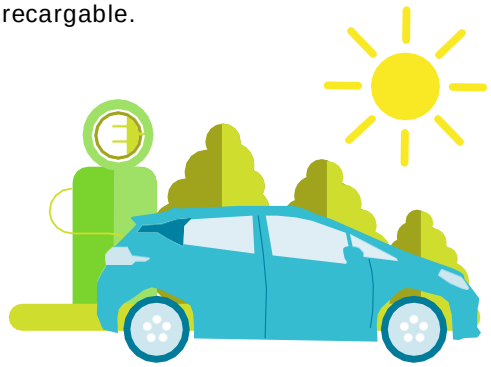
A diverse organization, Electrify America personnel bring experience from several industries and disciplines including automotive, vehicle charging, technology and government. The current employee count is more than 60 with the majority of personnel focused on infrastructure operations, the key group that oversees finding locations for chargers and installing them. A separate team handles marketing and education and California's Green City initiative.



Nociones básicas de vehículos eléctricos

¿Qué es un vehículo eléctrico?

Un vehículo eléctrico o VE, es un vehículo propulsado por una batería recargable de grandes dimensiones en vez de un motor de combustión de gasolina. Los vehículos eléctricos generalmente aceleran más rápido y proporcionan una experiencia de manejo más suave y silenciosa. Estos vehículos eliminan la necesidad de reabastecimiento en una estación de gasolina y no producen emisiones de escape. Otros VE obtiene la energía mediante celdas de hidrógeno, las cuales convierten el combustible de hidrógeno almacenado en electricidad, en vez de una batería recargable.



¿Cómo se diferencia un vehículo eléctrico de uno híbrido?

Los vehículos híbridos utilizan a la vez una batería y un motor de gasolina para mejorar el kilometraje en general, pero aunque poco, siempre queman gasolina. Otros automóviles como el Chevy Volt, son un punto medio entre un vehículo híbrido y uno eléctrico, son llamados vehículos eléctricos enchufables (PHEV, en inglés), pueden recorrer distancias cortas sólo con electricidad, pero cuando se necesita una distancia de viaje mayor o cuando las temperaturas son extremas, están diseñados para funcionar tanto con el suministro eléctrico o gasolina.

Beneficios de poseer un vehículo eléctrico

No más estaciones de gasolina

Nunca más necesitará detenerse por gasolina. Cargue su vehículo en casa durante la noche, igual que su teléfono, o en el trabajo si su empleador ofrece un medio de recarga en el lugar de trabajo. Además, el incremento en la disponibilidad de estaciones de carga rápida de CC permite que muchos propietarios de VE puedan volver a cargar entre el trayecto de casa al trabajo o viceversa para aumentar el recorrido del viaje por carretera.

Fáciles de manejar y rápidos

En un vehículo eléctrico, la energía se genera y transmite más rápido que en los vehículos convencionales de gasolina lo que significa una experiencia de manejo más emocionante, especialmente cuando se acelera desde cero.

Tecnología de vanguardia

El tablero de instrumentos de los vehículos eléctricos muestra el rango de alcance de la batería, la eficiencia de manejo de la corriente y a menudo, las ubicaciones y la ruta a su estación de carga predilecta. Comúnmente, también muestran cuánta energía (típicamente desperdiciada en calor y fricción en el frenado común) se está aprovechando como electricidad añadida a la batería. Muchos defensores de los VE adoran el manejo con “un solo pedal”.

Pueden ahorrar dinero

En muchos lugares los conductores de vehículos eléctricos pagan aproximadamente 1.00 USD para manejar la misma distancia que con un galón de gasolina en un vehículo convencional. Los vehículos eléctricos también son más baratos de operar, con un casi nulo costo de mantenimiento como el generado por los cambios de aceite.

Manejo silencioso

Virtualmente, no existe ruido de motor en un vehículo eléctrico lo que lo hace casi silencioso y libre de vibraciones. Muchos conductores de vehículos eléctricos consideran esta "tranquila" cabina como uno de los más grandes beneficios de la conducción eléctrica.

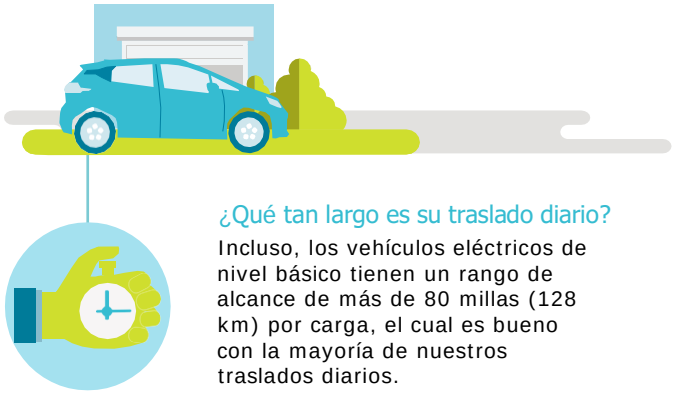
Beneficios medioambientales

Los vehículos eléctricos están libres de aceite, producen menos emisiones de carbono que los motores a gasolina y no generan contaminantes a la salida del escape. También pueden utilizar fuentes de energía renovable como la de los paneles solares, los cuales se puede instalar en muchos hogares.

electrify america

Nociones básicas de vehículos eléctricos

¿Es un vehículo eléctrico adecuado para usted?

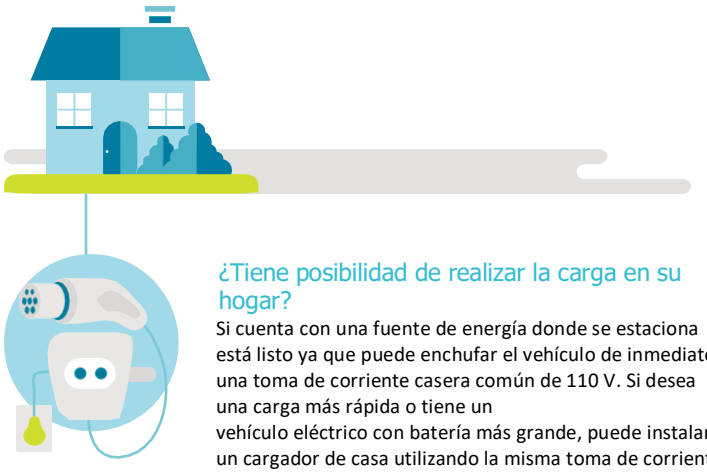


¿Qué tan largo es su traslado diario?

Incluso, los vehículos eléctricos de nivel básico tienen un rango de alcance de más de 80 millas (128 km) por carga, el cual es bueno con la mayoría de nuestros traslados diarios.

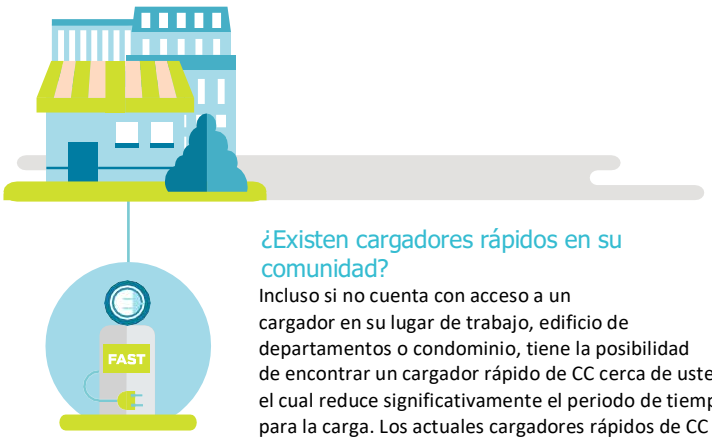
¿Hay cargadores disponibles donde usted trabaja?

Si los hay, instantáneamente usted puede duplicar su rango de conducción diario. La carga para los vehículos eléctricos se está volviendo mucho más común en los lugares de



¿Tiene posibilidad de realizar la carga en su hogar?

Si cuenta con una fuente de energía donde se estaciona está listo ya que puede enchufar el vehículo de inmediato a una toma de corriente casera común de 110 V. Si desea una carga más rápida o tiene un vehículo eléctrico con batería más grande, puede instalar un cargador de casa utilizando la misma toma de corriente de alto voltaje de 240 V como la que utiliza su lavadora, secadora o estufa. Este suministro eléctrico mejorado proporciona un rango de alrededor de 22 millas (35 km) por hora de carga, contra aproximadamente un rango de 5 millas (8 km) por hora con una toma eléctrica de 110 V.



¿Existen cargadores rápidos en su comunidad?

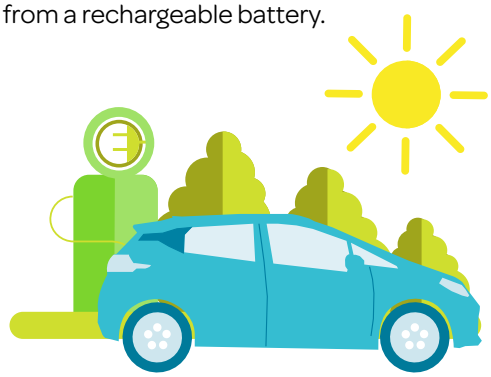
Incluso si no cuenta con acceso a un cargador en su lugar de trabajo, edificio de departamentos o condominio, tiene la posibilidad de encontrar un cargador rápido de CC cerca de usted, el cual reduce significativamente el periodo de tiempo para la carga. Los actuales cargadores rápidos de CC de 50 kW proporcionan un rango de alrededor de 3 millas (5 km) por minuto de carga, mientras que los nuevos diseños de 150 kW proporcionan alrededor de 9 millas (14 km) por minuto de carga.

electrify america

Electric Vehicles 101

What is an Electric Vehicle?

An electric vehicle, or EV, is powered by a large rechargeable battery instead of a gas-burning engine. Electric vehicles generally accelerate faster and deliver a smoother and quieter drive experience. They eliminate the need to fill up at a gas station and produce zero emissions from the tailpipe. Other EVs are powered by fuel cells, which convert stored hydrogen fuel into electricity, instead of from a rechargeable battery.



How is an Electric Vehicle Different Than a Hybrid?

Hybrids use both a battery and a gasoline engine to improve overall mileage, but nearly always burn gas. Other cars, like the Chevy Volt, are a cross between a hybrid and electric vehicle; these so-called Plug-In Electric Vehicles (or PHEVs) can drive shorter all electric distances but when longer distance travel is needed, or when temperatures are extreme, they are designed to operate with both electric and gasoline power.

Benefits of Owning an Electric Vehicle

No More Gas Stations

You'll never have to stop for gas again. Charge your vehicle at home overnight, just like your phone, or at work if your employer offers workplace charging. Plus, increasingly available DC fast charging stations allow many EV owners to top off between home or work for extended highway travel.

Fun-to-Drive and Quick

In an electric vehicle, the power is generated and transmitted more quickly than conventional gasoline vehicles which means a more exciting drive experience, especially when accelerating from a stop.

Cutting Edge Technology

The instrument panels of electric vehicles display the battery's range, current driving efficiency and oftentimes, locations and routing to your preferred charging station. They also generally show what braking energy (typically lost to heat and friction with typical braking) is being harnessed into added electricity for the battery. Many EV advocates love "one pedal driving."

Can Save Money

In many places electric vehicle drivers pay approximately $1.00 to drive the same distance as a gallon of gas in a conventional car. EVs are also cheaper to operate, with almost no maintenance costs like oil changes.

Quiet Ride

There is no virtually no motor noise in an electric vehicle making them nearly silent and vibration free. Many EV drivers consider this "tranquil" cabin to be one of the strongest benefits of driving electric.

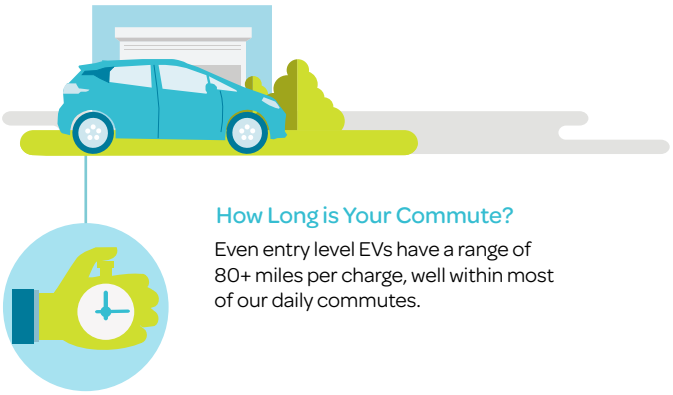
Environmental Benefits

Electric vehicles are oil-free, produce less carbon emissions than a gas engine and create no pollution at the tailpipe. They can also be powered by renewable energy sources like solar panels, which can be installed in many homes.

electrify america

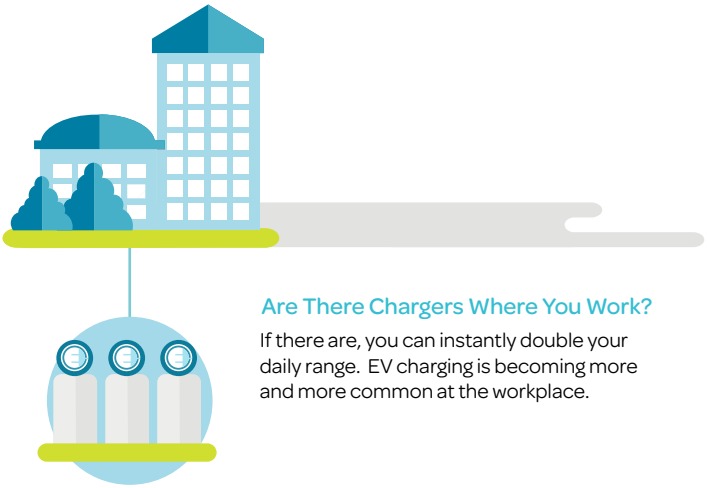
Electric Vehicles 101

Is an Electric Vehicle for You?



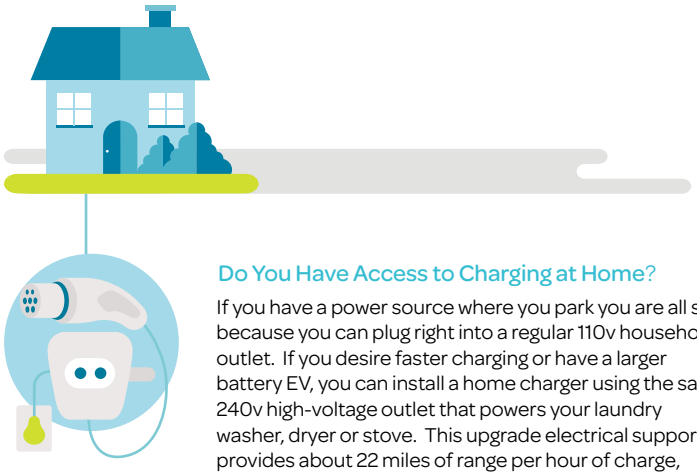
How Long is Your Commute?

Even entry level EVs have a range of 80+ miles per charge, well within most of our daily commutes.



Are There Chargers Where You Work?

If there are, you can instantly double your daily range. EV charging is becoming more and more common at the workplace.



Do You Have Access to Charging at Home?

If you have a power source where you park you are all set because you can plug right into a regular 110v household outlet. If you desire faster charging or have a larger battery EV, you can install a home charger using the same 240v high-voltage outlet that powers your laundry washer, dryer or stove. This upgrade electrical support provides about 22 miles of range per hour of charge, versus about 5 miles of range per hour with a 110V household outlet.

Are There Fast Chargers in Your Community?

Even if you don't have access to a charger at your workplace, apartment building or condominium, you may be able to find a DC fast charger near you, which greatly reduces the time spent charging. Current 50Kw DC fast chargers provide about 3 miles of range per minute of charging, while new 150Kw designs provide about 9 miles of range per minute of charge.

Community-Based Organization Outreach Materials

Ready to Replace Your Ride?

Are You Eligible?

- Is your annual income within the ranges in the chart?
- Do you own your car?
- Do you live in either Orange County, portions of LA, Riverside, San Bernardino counties or Coachella Valley?
- Has your vehicle been running in CA for the past 2 years?

Persons in household	Income level		
	Low (≤225% FPL)	Moderate (≤300% FPL)	Above moderate (≤400% FPL)
1	$27,315	$36,420	$48,560
2	$37,035	$49,380	$65,840
3	$46,755	$62,340	$83,120
4	$56,475	$75,300	$100,400
5	$66,195	$88,260	$117,680
6	$75,915	$101,220	$134,960
7	$85,635	$114,180	$152,240
8	$95,355	$127,140	$169,520
For families/households with more than eight persons, add $4,180 for each additional person.			

Apply:

Fill out an online application form: www.ReplaceYourRide.com

Documents Needed:

- Copy of a Government issued photo ID
- Proof of residence
- Income documentation
- Copy of vehicle title
- Document showing vehicle operation in CA over the past two years
- Emissions test results (a recent smog check test, if available)

Incentive for Replacement Vehicles [1] Eight Years Old and Newer					
Income Eligibility	Conventional		Hybrid		Plug-In Hybrid & Zero Emission [3 4]
	20+ MPG [2]	35+ MPG	20+ MPG	35+ MPG	
Low	$4,000	$4,500	$4,000 or $6,500	$4,500 or $7,000	$4,500 or $9,500
Moderate	-----	$3,500	-----	$3,500 or $5,000	$3,500 or $7,500
Above Moderate	-----	-----	-----	-----	$2,500 or $5,500

1 Option available to receive transportation vouchers between $2,500 to $4,500 instead of replacement vehicles.

2 MPG threshold varies by vehicle model year.

3 Zero-emission includes battery electric vehicles (BEVs) and fuel cell vehicles.

4. BEVs are eligible for an additional rebate up to $2,000 for the installation of charging equipment.

PACE 和 Electrify America

之间的合作

由 Veronica Esquivel 呈献

关于我们

Pacific Asian Consortium in Employment

PACE自1975年以来一直为社区服务。它是一家社区发展公司，致力于创造经济解决方案，以应对亚太裔和其他多元化社区在就业，教育，住房，环境和商业发展的挑战。

我们的方案：

- 劳动力发展
- 环境服务（能源与环境）
- 早期儿童教育
- 经济实惠住房
- 业务发展
- PACE护理
- PACE与Electrify America（EA）合作, 推动目标居民购买或使用零排放车辆（ZEV）

什么是 ZEV?

零排放车辆 (ZEV)

电池电动车（EV）的动力是由大型充电电池推动而不是用燃气发动机。（又名电动汽车）

您将受益于

1. 方便..... 无需加油站！
2. 性能
3. 最新科技！
4. 有助于环境！
5. 节约
6. 奖励方案

奖励方案

- **取代乘车分享回扣**
  - 居住在南海岸航空区（包括橘县以及洛杉矶，Riverside County 滨江和 San Bernadino 圣伯纳迪诺县的部分地区），最高可获得 $4,500
  - 符合邮政编码条件的居民购买或租赁选择混合动力车或电动车时可获得额外的资金最高达$ 5,000

- **合格条件:**
  - 满足收入要求
  - 住在南海岸空气质量管理区
  - 拥有符合计划要求的车辆

奖励方案（继续）

- **清洁汽车回扣项目 (CVRP):**
  - 购买或租赁新型插电式混合动力电动汽车（PHEV）或电池电动汽车（BEV）的低收入客户可得额外折扣高达$ 4,500

- **合格条件** - 符合条件的申请人必须符合以下要求，但也不限于：
  - 当购买或租赁退款车辆时，个人，企业*，非营利组织或政府实体；总部设在加州或拥有加利福尼亚州的关联公司
  - 当申请时，符合收入资格要求
  - 在用尽可回扣资金之前以及在车辆购买或租赁日期的18个月内提交申请表格.†

*Sole proprietorships and DBA's (Doing Business As; also, called fictitious business name, assumed business name, or trade name) cannot apply as a business and must instead apply as an individual. Additionally, a trust is not considered a business and any vehicle purchased through a trust will be processed as an individual application and the individual submitting the application on behalf of the trust is subject to income requirements.

†For Tesla and other vehicles ordered without a standard lease/purchase agreement, the date of first registration with the California DMV will be considered the date of purchase or lease.

奖励方案（继续）

南海岸航空区居民
节省高达
$4,500

+

符合条件的邮政编码？
额外节省
$5,000

+

新车
申请CVRP回扣最多
$4,500

总额高达
$14,000!

奖励方案（继续）

- SCE清洁燃料奖励计划$ 1,000
- LADWP合格的二手EV或PHEV计划$450
- EVSE安装奖励 - 不同的金额可从 Edison, LADWP, 当地水电费公司
- 蓝色车LA - ZEV汽车共享，可为收入合格的个人提供折扣

Plug Into the Present

PACE & Electrify America 협력

Presented by Veronica Esquivel

소개

- Pacific Asian Consortium in Employment 페이스(PACE)는 1975년에 설립한 비영리단체로, 퍼시픽 아시안과 다른 다양한 커뮤니티를 위해 사회에서 고용, 교육, 주거, 환경 및 비즈니스 개발의 어려움을 해결할 수있는 경제활동 지원 및 커뮤니티 개발 단체입니다.
- 지원 프로그램:
  - 인력 개발 (Workforce Development)
  - ***환경 서비스 (에너지& 환경)***
  - 유아 교육
  - 어포더블 하우징- 저 · 중 소득자를 위한 주택
  - 비지니스 개발
  - PACE 케어
- 페이스(PACE)는 일렉트릭파이 아메리카와(Electrify America, EA) 파트너쉽을 맺음으로 대상 저주자에 한해서 친환경자동차(Zero Emission Vehicles, ZEV) 구매 보급 장려 프로그램을 실시하고 있습니다.

ZEV란?

Zero Emission Vehicle (ZEV)

친환경 자동차, 매연을 발생하지 않는 온실 가스 제로 배출 차량.

배터리 전기차(EV)로 배터리에 축적된 전기로 모터를 회전시켜서 자동차를 구동. (aka 전기자동차)

여러분께 드리는 혜택

1. 편리...더이상 주유소방문은 그만!
2. 성능
3. 최신 기술!
4. 환경 보호!
5. 절약
6. 인센티브 프로그램

인센티브 프로그램

- **<u>자가 차량 교체 리베이트 (Replace Your Ride Rebates):</u>**
  - South Coast 대기 지역 (Orange County, LA, Riverside 및 San Bernardino 카운티의 일부 포함)에 거주자 분들께 **최대** **$4,500** 보조금혜택을 받으실수 있습니다.
  - 해당 자격이 되는 Zip code 거주자로 하이브리드 또는 전기차 구매하신분들께 추가로 **최대** ***$5,000***의 지원금과 리스 옵션을 제공해드립니다
- **<u>자격부분:</u>**
  - 소득 요건 충족
  - 사우스 코스트 대기 품질 관리 지구에 거주
  - 프로그램 요구 사항을 충족하는 차량 소유

인센티브 프로그램 (연결)

- **<u>친환경 차량 리베이트 프로젝트</u>**

  <u>(Clean Vehicle Rebate Project, CVRP):</u>

  - 신규 플러그인 하이프리드 전기차량 (Plug-In Hybrid Electric Vehicle , PHEV) 또는 배터리식 전기차량 (Battery Electric Vehicle, BEV)을 구매 또는 리스하신 저소득층 고객분들께 추가로 **최대** ***$4,500*** 리페이트를 제공해드립니다.

- ***자격요건***- 지원 자격을 갖춘 지원자는 다음과 같은 요구 사항을 충족해야합니다

  - 리베이트 차량을 구매하거나 리스 할 당시 캘리포니아에 있거나 캘리포니아에 소재한 계열사가있는 개인, 사업체*, 비영리 단체 또는 정부 기관이어야합니다.
  - 신청서 접수 당시 소득 자격 요건 충족.
  - 리베이트 혜택이 끝나기 전 자동차 구매 또는리스 일자로부터 18 개월 이내에 신청서를 제출하십시오.†

* 독점 기업 및 DBA (Doing Business As, 가상의 상호, 가상의 비즈니스 이름 또는 상호명 라고도 함)는 비즈니스로 적용 할 수 없으며 대신 개인으로 신청해야합니다. 또한 신탁은 사업으로 간주되지 않으며, 신탁을 통해 구매 한 차량은 개별 신청으로 처리되며, 신탁을 대신하여 신청서를 제출하는 개인은 소득 요건의 적용을받습니다.

† 테슬라 및 표준리스 / 구매 계약없이 주문한 다른 차량의 경우, 캘리포니아 DMV에 처음 등록한 날짜는 구매 날짜 또는 리스 날짜로 간주됩니다.

인센티브 프로그램 (연결)

사우스 코스트
거주자분들께 최고

$4,500

+

해당 자격이 되는
Zip code 에 계십니까?
추가 최대 절약가능

$5,000

+

새 차량의 경우 CVRP
리베이트 신청으로 최대

$4,500

총 최고

$14,000!

인센티브 프로그램 (연결)

- SCE 클린 연료 보상 프로그램 $1,000
- LADWP 공인 중고 EV 또는 PHEV $450
- EVSE 설치 인센티브 – Edison, LADWP, 로컬 유틸리티의 다양한 금액 혜택
- 블루 카 LA. - ZEV 자동차 공유, 소득 자격을 갖춘 개인분들께 할인 가능.

Hướng vào thời hiện đại

Sự hợp tác giữa PACE &
Điện khí America

Trình bày bởi Veronica Esquivel

Về Chúng tôi

- PACE Pacific Asian Consortium in Employment đã phục vụ cộng đồng từ năm 1975. Đây là một tập đoàn phát triển cộng đồng nhằm sáng tạo các giải pháp kinh tế để đáp ứng những thách thức về việc làm, giáo dục, nhà ở, môi trường và phát triển kinh doanh cho cộng đồng Châu Á Thái Bình Dương và các cộng đồng các sắc dân khác.
- Chương trình của chúng tôi:
  - Workforce Development (Phát Triển Lực Lượng Lao Động)
  - **Environmental Services (Energy & Environment)** (Năng Lượng & Môi Trường)
  - Early Childhood Education (Giáo Dục Mầm Non)
  - Affordable Housing (Nhà Ở Giá Thích Nghi)
  - Business Development (Phát Triển Kinh Doanh)
  - PACE Care (Sự Quan Tâm Của Cơ Quan PACE)

PACE hợp tác với Electrify America (EA) để thúc đẩy việc mua sắm hoặc sử dụng của Zero Emission Vehicles (ZEV) mang lợi ích cho cư dân

ZEV là gì?

Zero Emission Vehicle (ZEV)

Một chiếc xe điện chạy bằng bình điện (EV) được cung cấp năng lượng bằng một lượng lớn điện sạc thay vì một động cơ chạy bằng xăng. (còn gọi là xe điện aka)

Lợi ích cho BẠN

1. Thuận tiện … Không còn trạm xăng nữa!
2. Có Hiệu Suất.
3. Công Nghệ Mới Nhất!
4. Giúp Môi Trường!
5. Tiết Kiệm
6. Chương Trình Ưu Đãi

Chương Trình Ưu Đãi

- **<u>Thay thế chương trình giảm giá xe của bạn</u>:**
  - Cư trú tại không gian trong quận hạt South Coast (bao gồm Quận Cam, các khu vực LA, Riverside và San Bernardino) và ***nhận tới $4.500***
  - Có thêm phần tài trợ và chọn lựa thuê xe dành cho cư dân ở các mã số vùng thích hợp để mua xe hybris (chạy bằng xăng & điện) hoặc xe điện ***lên tới $5,000***

- **<u>Đủ điều kiện</u>:**
  - Đáp ứng yêu cầu thu nhập
  - Sống trong Khu Quản Lý Chất Lượng Không Khí South Coast
  - Sở hữu một chiếc xe đáp ứng các yêu cầu của chương trình

Chương Trình Ưu Đãi (tiếp theo)

- **<u>Dự án giảm giá xe sạch (CVRP)</u>:**
  - Giảm giá bổ sung cho những khách hàng có thu nhập thấp hơn mua hoặc thuê Xe điện hỗn hợp cắm điện mới (PHEV) hoặc Xe điện chạy pin (BEV) lên tới ***$4.500***
- ***Đủ điều kiện:*** - Ứng viên đủ điều kiện phải đáp ứng các yêu cầu bao gồm, nhưng không giới hạn ở những điều sau:
  - Là một cá nhân, doanh nghiệp*, tổ chức phi lợi nhuận hoặc chính phủ có trụ sở tại California hoặc có chi nhánh tại California tại thời điểm chiếc xe giảm giá được mua hoặc thuê.
  - Đáp ứng các yêu cầu đủ điều kiện về thu nhập tại thời điểm nhận đơn.
  - Gửi đơn trước khi số tiền giảm giá đang có sẵn bị cạn kiệt và trong vòng 18 tháng kể từ ngày mua hoặc thuê xe.†

* Doanh nghiệp tư nhân và của DBA (Làm kinh doanh, cũng được gọi là tên doanh nghiệp hư cấu, tên doanh nghiệp giả định hoặc tên thương mại) không thể áp dụng như một doanh nghiệp và thay vào đó phải ghi tên tham dự với tư cách cá nhân. Hơn nữa, một ủy thác không được coi là một doanh nghiệp và bất kỳ chiếc xe nào được mua thông qua ủy thác sẽ được xử lý như một ứng dụng riêng lẻ và cá nhân nộp đơn thay mặt cho ủy thác phải tuân theo các yêu cầu về thu nhập.

† Đối với Tesla và các phương tiện khác được đặt hàng mà không có hợp đồng thuê/mua tiêu chuẩn, ngày đăng ký đầu tiên với DMV California sẽ được coi là ngày mua hoặc thuê.to income requirements

Chương Trình Ưu Đãi (tiếp theo)

Cư dân South Coast tiết kiệm tới

$4,500

+

Trong MÃ SỐ vùng đủ điều kiện? Tiết kiệm tới

$5,000

+

Đối với xe mới, đăng ký giảm giá CVRP lên tới

$4,500

Tổng cọng tới

$14,000!

Chương Trình Ưu Đãi (tiếp theo)

- Chương trình thưởng nhiên liệu sạch $1,000
- Chương trình EV hoặc PHEV được sử dụng đủ tiêu chuẩn LADWP $450
- Ưu đãi và cài đặt EVSE - Số tiền khác nhau có sẵn từ Edison, LADWP, các cơ sở tiện ích địa phương
- Xe màu xanh LA. - Chia sẻ xe ZEV, giảm giá dành cho các cá nhân đủ điều kiện thu nhập

Hấp dẫn? Bước kế tiếp là…

Plug Into the Present

A collaboration between PACE & Electrify America

Presented by Veronica Esquivel

About Us

- Pacific Asian Consortium in Employment PACE has been serving the community since 1975. It is a community development corporation that creates economic solutions to meet the challenges of employment, education, housing, environment, and business development in the Pacific Asian and other diverse communities.
- Our Programs:
  - Workforce Development
  - ***Environmental Services (Energy & Environment)***
  - Early Childhood Education
  - Affordable Housing
  - Business Development
  - PACE Care
- PACE is partnering with Electrify America (EA) to promote the purchase or use of Zero Emission Vehicles (ZEV) among targeted residents.

What is ZEV?

Zero Emission Vehicle (ZEV)

A battery electric vehicle (EV) is powered by a large rechargeable battery instead of a gas-burning engine. (aka electric vehicle)

Benefits To *YOU*

1. Convenience…No more gas stations!
2. Performance
3. Latest Tech!
4. Helps the environment!
5. Savings
6. Incentive Programs

Incentive Programs

- **<u>Replace Your Ride Rebates:</u>**
  - Reside in the South Coast air district (includes Orange County, portions of LA, Riverside and San Bernardino counties) and receive ***up to*** ***$4,500***
  - Additional funding and lease options available to residents in eligible ZIP codes who purchase a hybrid or electric vehicle of ***up to*** ***$5,000***
- **<u>Eligibility:</u>**
  - Meet income requirements
  - Live in the South Coast Air Quality Management District
  - Own a vehicle that meets program requirements

Incentive Programs (cont.)

- **Clean Vehicle Rebate Project (CVRP):**
  - Additional rebates for lower income customers who purchase or lease a new Plug-In Hybrid Electric Vehicle (PHEV) or Battery Electric Vehicle (BEV) of ***up to $4,500***
- ***Eligibility*** - Eligible applicants must meet requirements that include, but are not limited to, the following:
  - Be an individual, business*, nonprofit or government entity that is based in California or has a California-based affiliate at the time the rebated vehicle is purchased or leased.
  - Meet income eligibility requirements at the time application is received.
  - Submit an application prior to exhaustion of available rebate funds and within 18 months of the vehicle purchase or lease date.†

*Sole proprietorships and DBA's (Doing Business As; also, called fictitious business name, assumed business name, or trade name) cannot apply as a business and must instead apply as an individual. Additionally, a trust is not considered a business and any vehicle purchased through a trust will be processed as an individual application and the individual submitting the application on behalf of the trust is subject to income requirements.

†For Tesla and other vehicles ordered without a standard lease/purchase agreement, the date of first registration with the California DMV will be considered the date of purchase or lease.

Incentive Programs (cont.)

South Coast residents save up to

$4,500

+

In an eligible ZIP code? Save up to an extra

$5,000

+

For new vehicles, apply for a CVRP rebate up to

$4,500

Total Up to

$14,000!

Incentive Programs (cont.)

- SCE Clean Fuel Reward Program $1,000
- LADWP Qualified Used EV or PHEV Program $450
- EVSE install incentives - Various amounts available from Edison, LADWP, local utilities
- Blue Car LA. - ZEV car sharing, discounts available for income qualified individuals

Una colaboración entre PACE & Electrify America

Presentado por Veronica Esquivel

Acerca de Nosotros

- Pacific Asian Consortium in Employment PACE ha estado sirviendo la comunidad desde 1975. Es una corporación del desarrollo de la comunidad que crea soluciones economicas para satisfacer las necesidades de empleo, educación, vivienda, medio ambiente, y el desarollo de negocios en las comunidades de los Asiaticos Pacifícos y otras diversas comunidades.
- Nuestros Programas:
  - Desarrollo de Empleo Workforce Development
  - ***Servicios Ambientales Environmental Services (Energy & Environment)***
  - Educación Temprana del Desarrollo del Nino Early
  - Desarrollo de Negocios
  - PACE Care
- PACE esta asociado con Electrify America (EA) para promover la compra o uso de Vehiculos de Cero Emisiones (ZEV) entre los residentes de las comunidades designadas.

¿Qué es ZEV?

Vehiculos de Cero Emisones (ZEV)

Un vehiculo eléctrico con carga de batería(EV) recibe su carga por medio de una batería grande recargable en lugar de utilizar motor que quema combustible. (alias vehiculo eléctrico)

Beneficios Para *USTED*

1. Conveniente…¡No mas estaciones de gasolina!
2. Rendimiento
3. ¡Tecnología Actual!
4. ¡Ayuda al medio ambiente!
5. Ahorros
6. Programas de Incentivos

Programas de Incentivos

- **<u>Reembolsos de Replace Your Ride:</u>**
  - Reside dentro el distrito de South Coast air (incluye el Condado de Orange, porciones de los condados de LA, Riverside y los San Bernardino) y reciba ***hasta*** ***$4,500***
  - Fondos addicionales y opciones de arrendamiento estan disponibles para residentes que compren un vehiculo hybrid o un vehiculo eléctrico y que se encuentren dentro los códigos postales elegibles ***hasta de*** ***$5,000***
- **<u>Elegibilidad:</u>**
  - Cumplir con los requisitos de ingreso
  - Vivir dentro el Districto de South Coast Air Quality Management
  - Ser dueño de un vehiculo que reuna los requisitos

Programas de Incentivos (cont.)

- **<u>Reembolso del Proyecto Clean Vehicle(CVRP):</u>**
  - Reembolosos addicionales para clientes con ingresos más bajos que compren o arrienden un nuevo Plug-In Hybrid Vehiculo Eléctrico(PHEV) o Vehiculo Eléctrico de Batería (BEV) ***hasta $4,500***
- ***<u>Elegibilidad</u>*** – los aplicantes elegibles deberán reunir los requisitos que incluye, pero no estan limitados, a lo siguiente:
  - Ser un individuo, negocio*, una entidad no lucrativa o gubernamental en California o haber establecido base en California cuando el vehiculo fue comprado o arrendado.
  - Reunir con los requistos de elegibilidad cuando la solicitud fue recibida.
  - Enviar la solicitud antes de que se agoten los fondos de reembolsos disponibles y dentro de los 18 meses que se haya hecho la compra o el arrendamiento.†

*Sole proprietorships and DBA's (Doing Business As; also, called fictitious business name, assumed business name, or trade name) cannot apply as a business and must instead apply as an individual. Additionally, a trust is not considered a business and any vehicle purchased through a trust will be processed as an individual application and the individual submitting the application on behalf of the trust is subject to income requirements.

†For Tesla and other vehicles ordered without a standard lease/purchase agreement, the date of first registration with the California DMV will be considered the date of purchase or lease.

Plug Into the Present

Isang Pagtutulungan ng PACE at Electrify America

Veronica Esquivel

Tungkol sa Amin…

- Pacific Asian Consortium in Employment Magmula noong 1975, ang PACE ay patuloy na nagsisilbi sa pamayanan upang mapaunlad ang mga komunidad ng mga iba't ibang lahi tulag ng nga taga0Asya Pasipiko. Ito ay gumagawa ng mga solusyong pang-ekonomiya upang harapin ang mga hamon ng paghahanap ng trabaho, edukasyon, pabahay, kapaligiran, at negosyo.
- Ang Aming mga Programa ay:
  - Workforce Development
  - ***Environmental Services (Energy & Environment)***
  - Early Childhood Education
  - Affordable Housing
  - Business Development
  - PACE Care
- Ang PACE ay nakikipagtulungan sa Electrify America (EA) upang itaguyod at palaganapin ang kaalaman ukol sa pagbili o pagtangkilik sa sasakyang di kuryente o ang tinatawag na Zero Emission Vehicles (ZEV) sa mga napiling komunidad.

Ano ba ang ZEV?

Zero Emission Vehicle (ZEV)

Ito ay isang sasakyan na pinatatakbo ng isang malaking baterya sa halip ng gasolina. Ito ay kadalasang tinatawag na electric vehicle.

Mga Benepisyo para sa IYO

1. Maginhawa…Di na kailangang pumunta sa gasolinahan!
2. Kakayahan
3. Pinakabagong Teknolohiya!
4. Tumultulong sa Kalikasan!
5. Katipiran
6. Mga Programang Nagbibigay ng Pabuya

Mga Programa ng Pabuya

- **Balik-Pera para sa Bagong Sasakyan (Replace Your Ride Rebates):**
  - Ang mga nakatira sa distritong sakop ng Baybaying Timog (South Coast) (kasama ang Orange County, mga bahagi ng LA, Riverside at San Bernardino counties) ay maaaring makatanggap ng hanggang ***$4,500***
  - Karagdagang pera at lease options para sa mga nakatira sa mga piling ZIP codes na bumili ng isang hybrid o electric vehicle hanggang ***$5,000***
- **Paano?**
  - Meet income requirements
  - Nakatira sa South Coast Air Quality Management District
  - Nagmamayari ng sasakyang meets program requirements

Mga Programa ng Pabuya(cont.)

- **Clean Vehicle Rebate Project (CVRP):**
  - Karagdagang balik pera (rebate) para sa mga mababa ang kinikita na bumili o nag-renta ng bagong Plug-In Hybrid Electric Vehicle (PHEV) o Battery Electric Vehicle (BEV) na maaaring umabot sa ***$4,500***
- ***Eligibility*** – Kinakailangang maabot ang mga sumusunod:
  - Isang tao, negosyo*, nonprofit o pamahalaan nasa California o may kasanib o sangay na taga-California pagbili o pag-rentang sasakyang may rebate.
  - Hindi lampas sa takdang sahod o kita noong sa nag-aply sa rebate
  - Magpadala ng applikasyon bago maubos ang pondo ng programa ukol sa balik-pera sa loob ng 18 buwan pagkabili o pag-renta ng sasakyan.†

*Sole proprietorships and DBA's (Doing Business As; also, called fictitious business name, assumed business name, or trade name) cannot apply as a business and must instead apply as an individual. Additionally, a trust is not considered a business and any vehicle purchased through a trust will be processed as an individual application and the individual submitting the application on behalf of the trust is subject to income requirements.

†For Tesla and other vehicles ordered without a standard lease/purchase agreement, the date of first registration with the California DMV will be considered the date of purchase or lease.

Mga Programa ng Pabuya (cont.)

Ang mga residente ng South Coast ay makakatipid hanggang

$4,500

+

Nakatira sa piling ZIP code? Makatipid ng karagdagang

$5,000

+

Para sa bagong sasakyan, mag-apply sa CVRP rebate na abot sa

$4,500

Para sa Kabuuang Umaabot sa

$14,000!

Mga Programa ng Pabuya(cont.)

- SCE Clean Fuel Reward Program $1,000
- LADWP Qualified Used EV or PHEV Program $450
- EVSE install incentives – Iba't ibang halaga magmula sa Edison, LADWP, at mga lokal na organisasyong naghahatid ng gas, koryente at tubig
- Blue Car LA. – Panandaliang paggamit ng ZEV, may mga diskuwente para sa taong mababa ang kinikita

Interesado ba kayo? Narito ang mga susunod na hakbang…

ZERO EMISSION VEHICLES
SMART PURCHASE AND LEASING CONSIDERATIONS

Getting a new car can be a complicated process. There are several decisions to make, including the type of vehicle, whether to get a new or used car, and how much you can spend. One of the biggest choices is whether you will buy or lease your vehicle.

When considering major purchases such as a house or car, a good rule to follow is to buy things that will increase in value over time and lease things that will lose value. Houses typically increase in value over longer periods of time. Cars begin to lose value as soon as you start driving them. Using this theory, it seems that leasing is the better way to go. But there are many other things to consider when you get a new car. When you decide on an electric vehicle, there are additional considerations that can impact the choice between buying and leasing.

WHAT IS THE DIFFERENCE BETWEEN BUYING AND LEASING?

The main difference between buying and leasing a car is ownership. When you buy a car, you own it and can keep for as long as you want. When you lease a car, it's like you are renting it from the dealer and you will have to return it at the end of the lease period, usually 2 or 3 years.

BUYING A CAR

- When you buy a car, you can drive it for as long as you want. You will not be required to give it back after a few years.
- Once you are ready for a different car, you are free to trade-in your car to the dealer for credit towards a new car. Or you can sell the car on your own.
- Once you have fully paid for the car, or completed all of your loan payments, you can continue to drive it without having to make any more payments.
- When you own the car, there is no mileage limit to be concerned about.

LEASING A CAR

- If you need to finance a car, the monthly payments for leasing can often be lower than buying.
- Leases typically require a lower down payment than a purchase.
- If you return the car early there are often early termination penalties.
- At the end of the lease, you simply return the car and walk away. You don't have to worry about selling the car or negotiation a trade-in price. But you will have no financial benefit from the car when you return it.

ZERO EMISSION VEHICLES
SMART PURCHASE AND LEASING CONSIDERATIONS

- As long as you have the car, you will have to make a monthly payment.
- Leased cars have a limit to the number of miles you can drive. When you return the car at the end of the lease period, you will be charged a fee for any miles over your limit. If you have a long commute or drive as part of your job, you will want to consider the mileage limit.
- You may need to be extra careful with maintaining a leased car. When you return the car, you might be charged extra if you return the car in poor condition.

▶ SPECIAL CONSIDERATIONS FOR ELECTRIC CARS

- Electric cars are improving rapidly. Newer technology is being incorporated into newer models much faster than it is with gasoline-powered cars. If having the newest technology is important to you, you might want to consider leasing your electric car.

- When you lease an electric car, the federal tax incentive will go to the dealer and not the “owner”. If you typically owe more than $7,500 in federal taxes at the end of the year, you won’t be able to claim this credit on a lease.

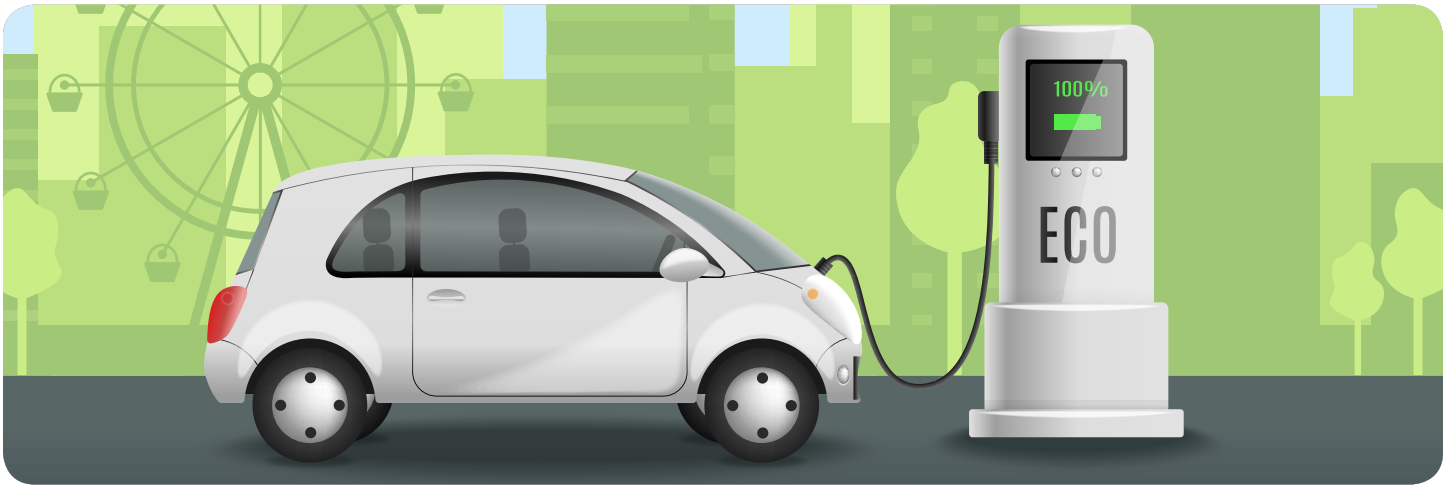
- In California, there are extra incentives that may make up for the federal incentive you would lose on a lease.

- Many electric carmakers offer leasing specials on electric cars that can reduce your monthly payments.

Contact your local EVE organization for assistance:

EVE
Electric Vehicles for Everyone

THE BENEFITS OF ZERO EMISSION VEHICLES



Zero Emission Vehicles (ZEVs) are electric cars that do not require gasoline to operate. An electric car is charged with a cable and plug. There are many benefits to driving an electric car.

Electric Vehicles are Affordable.

The purchase price of an electric car can often be higher than a regular gasoline powered car. However, there are incentives available that will lower the cost of purchasing an electric car. Purchase incentives may vary depending on your individual circumstances. Some of them include:

- **Federal Tax Credit** of **up to $7,500** when you purchase a plug-in electric vehicle.
- **Rebates from Your Utility Company** will give you rebates on your electric bill when you drive an electric vehicle.
- **Lower Electricity Rates** for customers who drive electric cars.
- **Insurance Discounts** to owners of electric cars.
- **Clean Vehicle Rebate Program (CVRP)** offers a rebate of **up to $7,000** when you purchase an electric vehicle.
- **Clean Vehicle Assistance Program** provides grants and affordable financing to help low-in come Californians purchase a new or used hybrid or electric vehicle.
- **Enhanced Fleet Modernization Program Plus-Up (EFMP PLUS-UP)** helps low-income individuals and families scrap old cars that make pollution, and replace them with used or new electric cars.
- **Discounts** for installing a charging station in your home.
- **Local Discounts** are offered by many cities that will reduce the cost of purchasing or leasing electric cars.

Electric Vehicles are Convenient.

▶ HOV (CARPOOL) LANES

If you own or lease an electric car, you can receive a decal that will allow you to drive in the High Occupancy Vehicle (HOV) lane. Many people call these the “carpool lanes”. The decal will allow you to use these lanes even if you are the only person in the car.

▶ LOWER MAINTENANCE COSTS

Electric vehicles have fewer parts than gasoline powered cars. They do not have

THE BENEFITS OF ZERO EMISSION VEHICLES

spark plugs, valves, combustion engines, mufflers, tailpipes and other parts that break and need to be repaired or replaced. You will not need to do oil changes or tune-ups.

▶ NO NEED TO GO TO THE GAS STATION

An electric vehicle will save you time and money because you will not need to go to the gas station anymore. If you charge your car during your sleeping hours, your car will be ready to go without worrying about fueling up. Most electric vehicle manufacturers offer 8 – 10 year warranties on their batteries. On average, current electricity rates to charge your car equal about the same as paying $1.00 per gallon for gas.

Electric Vehicles are Enjoyable to Drive.

There are different styles of electric vehicles, including SUVs and sporty models. Electric vehicles are quieter than gasoline-powered cars, are smooth to drive and have excellent at achieving speed quickly.

Electric Vehicles are Good for the Environment.

Many of us live in areas where there is air pollution and it is unhealthy to breathe. This is especially true in low income and immigrant communities. And air pollution is bad for everyone, but it can be particularly dangerous for children, the elderly and people with health conditions. Electric cars do not emit pollution into the air. Currently, electric vehicles are estimated to 54% less air pollution than gasoline -powered cars. As our electricity sources get cleaner, driving electric cars will contribute even more to a cleaner environment.

Contact your local EVE organization for assistance:

THE AFFORDABILITY OF ZERO EMMISSION VEHICLES

When you explore the cost of buying a new car, it may seem that electric vehicles are more expensive. It's true that the "sticker price" of an electric car can be higher than a regular gasoline powered car. But electric cars are cheaper to operate and maintain, and there are incentives available that will lower the cost of purchasing an electric car. If you consider all of the benefits and incentives, driving an electric vehicle can actually be less expensive than driving a gasoline-powered car.

Purchase incentives may vary depending on your individual circumstances, but some of them include:

Federal Tax Credit

You can receive a credit on your federal taxes of **up to $7,500** when you purchase a plug-in electric vehicle. The amount of the credit will depend on the size of the battery in the car you purchase.

Rebates from Your Utility Company

Your electric company will give you rebates on your electric bill when you drive an electric vehicle.These rebates will reduce the amount you pay to charge your car.

- PG&E CUSTOMERS are eligible to receive a **$500** clean fuel rebate.
- SOUTHERN CALIFORNIA EDISON customers can receive a **$450** rebate.
- SAN DIEGO GAS AND ELECTRIC also offers rebates in various amounts depending upon how many people apply for the credit.

Lower Electric Rates

Most utility companies offer special lower rates for customers who drive electric cars. Your EVE organization can show you how to apply for the lower rate through the CHANGES program.

Insurance Discounts

Many larger auto insurance companies offer discounts to owners of electric cars. The amount of those discounts will vary among insurance companies.

Clean Vehicle Rebate Program (CVRP)

This rebate program offers a rebate of **up to $7,000** when you purchase an electric vehicle. The amount of your rebate will depend upon the type of car you buy and your household income. If you are low income, your rebate will be larger.

THE AFFORDABILITY OF ZERO EMMISSION VEHICLES

Clean Vehicle Assistance Program

The Clean Vehicle Assistance Program provides grants and affordable financing to help low-income Californians purchase a new or used hybrid or electric vehicle. California residents that meet income qualifications can receive up to $5,000 toward the purchase or lease of a vehicle. The grants do not need to be repaid. You will need to submit proof of income and residency, such as a tax return and a driver's license.

Enhanced Fleet Modernization Program Plus-Up (EFMP PLUS-UP)

The EFMP Plus-Up Program helps low-income individuals and families scrap old cars that make pollution, and replace them with used or new electric cars. Depending on your income and the type of car you get, you can receive a **voucher for $5,000 - $9,500** toward an electric car to replace your older car. You may also be eligible for an additional $2,000 to install a charging station at home.

Discounts for Home Charging Stations

Some areas and utility companies offer rebates or discounts for installing a charging station in your home.

Local Discounts

Many cities also offer rebates or vouchers that will reduce the cost of purchasing or leasing electric cars.

Lower Cost of Ownership

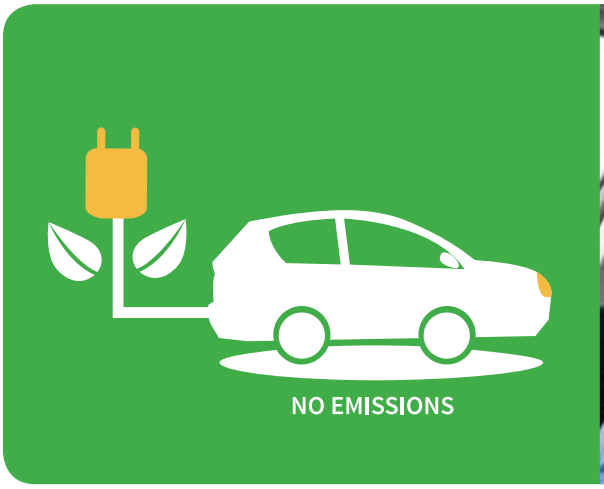
In addition to all of the programs that may help you reduce the cost of buying an electric car,

you will save money by not having to buy gas or repair and maintain your car. The cost of electricity to charge your car is about the same as paying $1 per gallon for gas. And you will not have the costs of car repairs and maintenance because electric vehicle have fewer parts that can break.

Your EVE organization can help you understand the discounts that you may qualify for, and may be able to help you apply for discounts through the CHANGES program.

Contact your local EVE organization for assistance:

ELECTRIC VEHICLE BASICS



WHAT ARE ZERO EMMISSION VEHICLES (ZEVs)?

A zero emission vehicle (or ZEV) is a vehicle that runs on electricity instead of gasoline. ZEVs emit no exhaust gas from the engine. These vehicles may also be called electric cars.
A hybrid car is not a ZEV because it uses gas to operate.

HOW FAR CAN YOU GO IN AN ELECTRIC VEHICLE?

Most electric cars can go 80 to 100 miles on a full charge, and some models can have a range of over 300 miles. Depending on the type of charger or battery, an electric car can take 30 minutes to a full day to charge. The average person in the U.S. drives less than 40 miles per day.

HOW DO ELECTRIC VEHICLES WORK?

To operate an electric car, you will need to charge the engine by plugging the car into a power source such as a charging station or a special connection at your home. This is similar to plugging in your cell phone to charge the battery.

Most people charge their car at home. This enables you to use electricity at a low cost.

When you charge your car at home, it can cost less per year than running an air conditioner. And you will not have the expense of buying gasoline.

HOW DO YOU CHARGE AN ELECTRIC VEHICLE?

You can charge your electric vehicle at home or at a public charging station. You simply plug your car in using a special electric cord that will come with the car or is attached to a charging station.

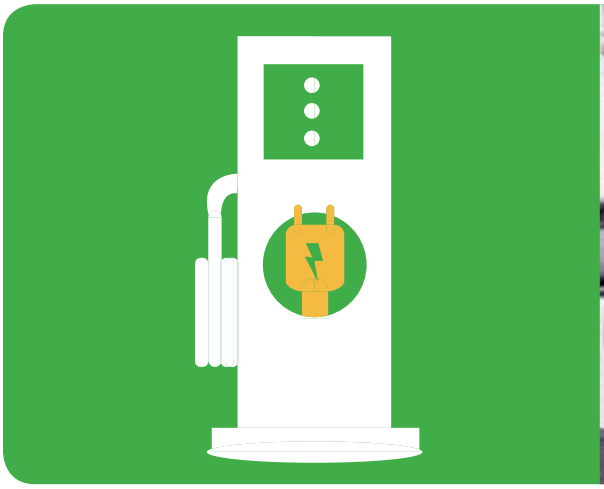
▶▶ CHARGING AT HOME

There are two types of chargers that will charge your car at home. Level 1 electric vehicle supply equipment (EVSE) and Level 2 EVSE. Both types of charging equipment have cords that you need to store safely and keep clean.

LEVEL 1 EVSE

Charging an electric car with Level 1 EVSE does not require any special equipment. You can plug your car into a regular 120 volt AC plug. But you will need to plug into a dedicated circuit that does not supply electricity to anything else in your house such as appliances or lights. Nearly all electric vehicles come with a cord that will fit a standard 3-prong outlet and the car. It will take about an hour of charging time to add a range of

ELECTRIC VEHICLE BASICS



2 – 5 miles to your vehicle, using Level 1 EVSE. Most people will charge their car this way when they are sleeping at night.

LEVEL 2 EVSE

Level 2 EVSE is faster and more convenient, but it requires special equipment. There are incentive programs that can help you pay for the installation of Level 2 EVSE charging equipment. With Level 2 EVSE you can get up to 60 miles of range per hour of charging time. Most EVSE charging units are installed in garages, but you can get an outdoor-rated unit installed in a driveway.

▶▶ CHARGING AWAY FROM HOME

Many workplaces and schools are installing charging stations that make it easy to charge your car during hours that you are usually parked.

A large and growing network of public charging stations are being installed throughout California for you to use during longer trips. Some of these stations are fast enough to charge your car in 30 minutes.

HOW WILL AN ELECTRIC VEHICLE CHANGE MY LIFESTYLE?

There are all types of electric vehicles, including small economy models, minivans and luxury cars. You can find an electric vehicle that fits your needs. And since most charging is done overnight at home, the only change you may experience is that you will not need to go to the gas station anymore.

Contact your local EVE organization for assistance:

EVE
Electric Vehicles for Everyone

ZERO EMISSION VEHICLES AND THE ENVIRONMENT

Zero Emission Vehicles (ZEVs), also called electric cars, can be affordable, modern and convenient for you and your family. Purchasing and owning an electric vehicle helps the planet, reduces pollution, and will reduce the impact of climate change for future generations. There are many benefits to driving electric cars including saving money by avoiding gasoline and repair costs. One of the biggest benefits can be your contribution to a clean environment.

Air Pollution

Many People live where the air is unhealthy to breathe:

- Children and elderly people have more difficulty breathing dirty air.
- People with illnesses such as asthma, COPD, lung cancer, hearth disease and diabetes are at more risk from air pollution.
- Low income people often live in communities with higher pollution.

One of the biggest causes of air pollution is the emissions that come from gasoline-powered cars.

Global Warming

Global warming is bad for our health and our planet. Some of the effects of global warming are already happening. We are seeing record high temperatures, wildfires, rising sea levels, droughts and flooding. The cars we drive are a major cause of global warming. In the United States, cars and trucks produce about 24 pounds of carbon dioxide and other global warming gases for every gallon of gasoline. About 5 pounds of those emissions come from producing and delivering the gas, and 19 pounds come right out of the car as exhaust.

WHAT ARE EMISSIONS?

Emissions are the exhaust fumes and vapors that come from the tailpipe of a car and from the pump when you put gasoline in it. Electric vehicles do not produce the emissions that contribute to smog because they do not have a tailpipe and electricity is a cleaner fuel than gasoline. If you are able to install solar panels at your house, your electric vehicle will be even cleaner and better for the environment.

There are two types of vehicle emissions – Direct and Life Cycle.

▶ DIRECT EMISSIONS

Direct emissions come from the fumes and exhaust of operating your vehicle. Electric cars are much cleaner than gasoline powered cars and have much lower direct emissions.

EVE
Electric Vehicles for Everyone

ZERO EMISSION VEHICLES AND THE ENVIRONMENT

LIFE CYCLE EMISSIONS

Life cycle emissions are generated over the life of the vehicle and include the emissions generated when the car is manufactured as well as when the car is disposed of after use. Life cycle emissions can be higher for electric cars, but the savings in in Direct Emissions still make electric cars cleaner. Most electric cars will make up for the extra Life Cycle Emissions after driving them for 6 – 18 months.

By the end of their lives, gasoline-powered cars emit almost twice as much global warming pollution as the equivalent electric car.

In most parts of California, the cost of charging an electric vehicle is the same as getting 85 miles per gallon in a gasoline-powered car.

YOU CAN MAKE A DIFFERENCE

We are all responsible for doing our part to make the world safer and healthier. One of the best ways to do that is to reduce the amount of pollution we put into the environment.

Electric cars are cheaper, quiet and enjoyable to drive, and do not produce emissions that pollute the air. Your EVE organization can help you find he best vehicle for you.

Contact your local EVE organization for assistance:
